DIRECTORS' REPORT (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

1. INTRODUCTION

The Directors hereby submit their report and the audited financial statements for the year ended 31 December 2022 which disclose the state of affairs of People's Bank of Zanzibar Limited ("the Bank" or PBZ).

2. INCORPORATION

The People's Bank of Zanzibar Limited (PBZ Bank) a Government owned commercial Bank offering both Islamic and Conventional Banking Services, was established on 30th June 1966 and incorporated under Cap. 153 of the Zanzibar Companies Decree which has been repealed and replaced by Companies Act No.15 of 2013.

3. VISION AND MISSION

Vision

'A leader in the provision of valued financial services to customers and other stakeholders'

Mission

'To provide innovative financial service solutions that are responsive to customer's needs at competitive cost'.

4. BRANCH NETWORK

As at end of year under review, the Bank had eighteen (18) branches and eleven (11) services delivery centers. Out of eighteen (18) branches, eight (8) branches offering Islamic Banking services located at Mwanakwerekwe, Mpirani, Chake Chake and Wete for Zanzibar, and Lumumba, Tazara, Mtwara and Dodoma for Tanzania Mainland. Other remaining ten (10) branches are offering traditional (conventional) Banking services. These branches are Forodhani, Malindi, Mlandege, Mwanakwerekwe, Chake chake and Wete for Zanzibar. Whereas in Tanzania mainland were Kariakoo, Tazara, Mtwara and Dodoma.

Out of eleven (11) service delivery centers three (3) are located at Mainland (Tandika, Kigamboni and Tandahimba), six (6) services delivery centers are located in Unguja Zanzibar and two (2) at Mkoani and Gombani Pemba Zanzibar. The year under review, two (2) new branches opened at Dodoma and two (2) new service centers opened at ZIPA and Gombani.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

4. BRANCH NETWORK (CONTINUED)

The Bank introduced alternative channels of services distribution such as ATMs, Bureau de changes and agency Banking. As at 31st December 2022 the Bank has forty-three (43) ATMs (2021: 34 ATMs) in the Umoja Switch which is network of seventeen (17) Banks. The Bank dominates 48% of all Umoja switch ATM transactions. Out of forty-three (43) ATMs eight (8) ATMs are located in Tanzania Mainland, seven (7) ATM in Pemba and twenty-seven (27) were fixed in Unguja. In the improvement of Agency Banking services for the year 2022, total of seven hundred and nine (709) agents (2021:293 Agents) have been registered to provide PBZ services of which Unguja had four hundred seventy-eight (478), Pemba one hundred thirty-three (133), Mtwara thirty-four (34), Dar es salaam fifty-six (56) and other regions eight (8).

During the year 2022, the bank continues with MasterCard project through Selcom that will join VISA services to enable our customers to transact worldwide through ATMs network same our ATMs accepts VISA cards and soon MasterCard from other Banks, likewise our customers can enjoy online purchase and merchant services through POS worldwide.

5. PRINCIPAL ACTIVITIES

The Bank licensed in Tanzania under the Banking and Financial Institutions Act, 2006 is the provision of Banking services.

PBZ Bank offered a wide range of commercial Banking services. The principal activities covered, inter alia, traditional and alternative (electronic) channels of Banking services. PBZ Bank continues to offer an array of products ranging from deposits to financing and investments, treasury business, money transfer and trade financing. Furthermore, the Bank is also engaged in foreign exchange dealings.

Islamic Banking activities

In recent years, Islamic Banking appetite has tremendously increased in Tanzania, especially in coastal area including Zanzibar. Islamic Banking services has higher contribution in promoting financial inclusion within society. Due to its growth, it shows the potential and great opportunity for more expansion, PBZ aiming to become a leader in the provision of Islamic services in Tanzania by offering innovative and valued services to its customers and improving geographical presence, PBZ is planning to have a fully-fledged Islamic banking subsidiary by 2025.

During the year, PBZ Ikhlas issued total of TZS. 81 billion as financing and investment that follows shariah compliance, an increase of 20% compared to previous year, Islamic financing contributed TZS 9,283 million in total bank revenue during the year, which is 20% higher, compared to TZS 7,729 million recorded in 2021. PBZ Ikhlas invested total of TZS. 7 billion in the SUKUK issued during the year from KCB bank, AMANA bank and IMAAM Microfinance, Islamic deposits grow by 23% to TZS 245 billion for the year 2022 (2021: TZS 200 billion), the growth contributed by increase in all category of Islamic deposits (current accounts, saving and time deposit intermediate). PBZ continues to offer innovative Islamic products to cater for the demand of the market.

Islamic Banking products are mainly dealing with deposit mobilization contracts and fund utilization (financing) products. During the year under review, Bank approved the Islamic financing facilities to the various sectors and products such as Murabaha, Bai-Muajjal, Ijarah, Mortgage, Salaam and Istisnaa, in year under review the bank launched new product of

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

Commodity Murabaha (Tawaruk) which helps customer to obtain cash from Halal arrangements of buying and selling commodity from the market, that aim to enhance the Islamic banking growth.

Under deposits mobilization, the products offered are current accounts (Mudharaba, Wadiah and Qard), saving accounts (Mudharaba and Wadiah) and Islamic fixed deposits. All products are available in Tanzania Shilling (TZS) and other three major foreign currencies i.e. United State Dollar (USD), Great Britain Pound (GBP) and European Money (Euro). Investment accounts are Musharakah and Mudharaba products.

Islamic bank same offer other various services to customers including all alternatives channels products such as mobile banking, internet banking, agency banking, mobile app, VISA services and other transaction services like forex exchange and money transfer both local and abroad.

The major challenge faces Islamic Banking is non-availability of Islamic banking legal and regulatory frame-work and lack of Sovereignty Sukuk for Islamic banks to trade, this hold back the Islamic banking growth and profitability Apart from increases of appetite for Islamic banking services in Tanzania.

Conventional Banking activities

PBZ Bank offers variety of Banking deposit products in the categories of current accounts, time deposits and savings accounts. The available deposit accounts are denominated in Tanzania Shilling (TZS) and other three major foreign currencies which are United State Dollar (USD), Great Britain Pound (GBP) and European Money (Euro). Additionally, the Bank grants different types of credit facilities in Commercial terms, personal/consumption loans, overdraft facilities and Mortgage financing.

Other products and services have been channelled electronically available through mobile Banking and internet Banking. Through these services, customers perform different Banking services in their Bank account via mobile phone, PBZ Mobile apps and workstation at any time anywhere performing various transactions such as:

- Government services and payments
- Money Transfer
- Cash withdraws including cardless services
- Airtime top up
- Bill payments
- Forex exchange rates request
- Cheque book request
- Balance enquiry
- PBZ agent and merchant Banking
- Mini and full Bank statement.

The Bank is well known for its expertise in Trade financing activities of import and export trade business such as letters of credit (LC), bills for collection etc. Other facilities are bid bonds, performance bonds, guarantees etc. Fund remittance services offered by the Bank are World remit (WR), Western union (WU), Express Money transfer, SWIFT and TISS services. All of these services are available both in Conventional and Islamic.

12. REVIEW OF OPERATING RESULTS

Operating Results

The Bank realized profit before tax amount of TZS 44,259 million during the year (2021: TZS 22,691 million) representing an increase of 95%. The increase was due good performances on personal loans that lead to the increase on interest income on personal loan, income from Islamic banking financing and foreign currency exchange income during the year under review.

The Bank posted 25% growth in interest income to TZS 89,312 million (2021: TZS 71,701 million). The increase in interest income resulted from personal and individual loan income. Interest expenses increased by 30% to TZS 18,016 million (2021: TZS 13,866 million). This increase resulted from higher cost of deposits. Interest margin decreased to 80% in 2022 from 81% in 2021.

In 2022, non-interest income, increased by TZS 9,066 million (39%) to TZS 32,447 million compared to TZS 23,381 million in year 2021. The increase in non-interest income was due to the increase in Income from Islamic Financing and Fees and commission income compared to previous period.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

Total operating expenses increased by TZS 3,939 million from TZS 75,500 million for the year 2022 to TZS 71,561 million for the year 2021. The increase was attributed by increasing in provision of loan and advances and asset written off during the year under review.

Financial Position

The Total assets of the Bank increased by 41% year-on-year to TZS 1,402,725 million (2021: TZS 996,369 million). This increase was mainly due to higher volume of loans and advances granted. Loan and advance increased on net basis by TZS 201,460 million or 34% to TZS 801,706 million in 2022 (2021: TZS 600,246 million). The increase in loan and advances is in line with the strategic plan and forecast target. Cash and balance with BOT increased by 40% to TZS 229,637 million in 2022 from TZS 193,338 million in 2021. The increase in cash was mainly attributed by the increase in both foreign and local currency. Investment in Government securities increased by TZS 27,850 million or 73% from TZS 38,915 million in 2021 to TZS 67,277 million in 2022. The increase was caused mainly by the increase of customers deposits for both conventional and Islamic.

During the year, customers' deposits liabilities which represent 90% of total liabilities increased by 40% to TZS 1,063,233 million in 2022 from TZS 758,229 million reported in 2021. Also, shareholder's fund rose by 21% to TZS 146,893 million in 2022 from TZS 121,866 million reported in 2021.

14. CASH FLOWS

In 2022, net cash flow from operating activities increased by 52% from TZS 86.85 billion (2021) to TZS 132 billion in 2022, investment in government securities outflow cash by TZS 28 billion (2021: inflow of TZS 1.8 billion) and lending to customer's outflow cash by TZS 201 billion (2021: outflow was TZS 129 billion). On the other hand, deposits from customers increased by TZS 305 billion (2021: increase of TZS 182 billion). Customer deposits are the major factors explaining the Bank's movement in cash flow generated from operations during the period deposits inflow cash of TZS 305 billion. Bank paid total of TZS 5.28 billion in various investing activities (2021: paid TZS 6.9 billion) and increase cash from financing activities by TZS 62.28 billion (TZS 47.68 billion inflow in 2021) The Bank continues to maintain sound liquidity position to meet its cash flow commitments.

15. LIQUIDITY AND FUNDING

The Bank places a strong emphasis on managing liquidity risk and daily cash flow management which is handled by the Treasury Department to ensure the Bank holds sufficient liquid assets to enable it to continue with its normal operations. Asset Liability

Committee (ALCO) also manage the Bank's exposure to liquidity risk by ensuring that limits are in line with realistic assumptions and track compliance on a monthly basis.

The Bank's main sources of funding are customers' deposits and shareholders' funds as part of its normal market operations.

16. SOLVENCY AND GOING CONCERN

The Bank has complied with the Bank of Tanzania liquidity and capital adequacy ratios. The Directors consider the Bank to be solvent. Nothing has come to the attention of the Directors indicates of any material uncertainties that may cast significant doubt on the Bank and its subsidiary's ability to continue as a going concern for at least twelve months from the date of this financial

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

statements. The Directors consider the Bank to be solvent within the meaning ascribed by the Companies Act No.15 of 2013 and Banking and Financial Institutions Act, 2006.

CONSIDERATIONS OF THE CORONAVIRUS OUTBREAK

Recently the corona virus global outbreak is slowing down and many countries release blocks, quarantines and restriction which open up the business operations and economic activities have improved.

Disruptions declined in many sectors that affected by corona outbreak, activities improved in industries such as tourism, hospitality, transportation, retail, and entertainment, that lead also to improve other related sectors such as manufacturing and the financial sector. As the outbreak continues to decline, the threat of bank to operate as a going concern due to uncertainty and material economic impact related to corona virus have decreased due to improvement in the following sectors.

- Effect on tourism and related sectors and individual customers on credit risk and loan performance
- Effect on market risks with regard to currency and interest rates disruption
- Effect on Fair Value Measurement (FVM) on material uncertainties for fair value of assets and liabilities
- Effect on Expected Credit Loss (ECL) assessment which consider the basis of inputs and assumptions and estimation techniques used, and how forward-looking information such as GDP, inflation rate, and unemployment etc.

Impact of Coronavirus outbreak to the bank performance

Decreasing of the pandemic has brought into greater impact on bank balance sheet size and income statements, specifically on result of increase on bank's profit, deposit and assets. Since the disease have spillover effects around the world on financial sector distress but in PBZ have resulted to the improvement on interest and non-interest income for the year ended 2022 as the result improved economic activities that lead bank's performed well compared to the budgeted profit and balance sheet assets which observed by favorable variances recorded from various votes. More ever, the bank liquidity improved during the year.

CAPITAL ADEQUACY

The Bank monitors the adequacy of its capital using ratios established by the Bank of Tanzania (BOT). These ratios measure capital adequacy by comparing the Bank's eligible capital with its risk assets, off-balance sheet exposure and commitments and market and operational risk positions at a weighted amount to reflect their relative risk.

The Bank is in compliance with the Bank of Tanzania's liquidity and capital adequacy ratios, including the required minimum Core Capital amount of TZS 140,260 million. The Board confirms that applicable accounting standards have been followed and that the financial statements have been prepared on a going concern basis. The Board has reasonable expectation that the Bank will have adequate resources to continue in operational existence and growth for the foreseeable future. The capital adequacy of the Bank is shown in note 48 to the financial statements.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

PRINCIPAL RISKS AND UNCERTAINTIES

PBZ is exposed to the following principal risks and uncertainties according to the nature of the business: -

Credit Risk

This is the risk of loss associated with borrower's potential inability or unwillingness to fulfil their contractual obligations on a timely basis. Credit risk may arise directly from the risk of default of a primary obligor (issuer, debtor, counterparty, or borrower) or indirectly from a secondary obligor (guarantor or reinsurer). We quantify credit risk, at both the individual obligor and portfolio levels, to manage expected credit losses in order to limit earnings volatility and minimize unexpected losses

Strategic Risk

This is the risk that the Bank or particular business areas will make inappropriate strategic choices or will be unable to successfully implement selected strategies or related plans and decisions. Business strategy is the major driver of our risk profile and consequently, the strategic choices we make in terms of business mix determine how our risk profile changes. Responsibility for selecting and successfully implementing business strategies is mandated to the individual heads of the businesses.

Operational Risk

The Bank is exposed to operational risks that may arise from inadequate or failed internal processes, people, systems or external events. However, the Bank has adequate operational risk policies and framework that cater for mitigation of these risks.

Liquidity Risk

This is the risk that we may be unable to generate sufficient cash or its equivalents in a timely and cost-effective manner to meet our commitments as they come due. Liquidity risk arises from mismatches in the timing and value of on-balance sheet and off-balance sheet cash flows. Our liquidity profile is structured to ensure that we have sufficient liquidity to satisfy current and prospective commitments in both normal and stressed business and liquidity environments.

Market Risk

This is defined to be the impact of market prices on our financial condition. This includes potential gains or losses due to changes in market-determined variables such as interest rates, credit spreads, equity prices, foreign exchange rates and implied volatilities.

Information Technology and Cyber Risk

This is the risk of financial loss, service disruptions, theft of intellectual property and confidential information, litigation and reputational damage due to the failure of information technology systems. We continue to develop advancements in cyber defence capabilities in an effort to support our business model, protect our systems and enhance the experience of our clients on a global basis by employing industry best practices and collaborating with peers and experts to provide our customers with confidence in their financial transactions.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

18. PRINCIPAL RISKS AND UNCERTAINTIES (CONTINUED)

Compliance Risk

Compliance risk is the current or prospective risk to earnings, capital and reputation arising from violations or non-compliance with laws, rules, regulations, agreements, prescribed practices, or ethical standards, as well as from incorrect interpretation of relevant laws or regulations. The Bank has developed adequate controls to ensure that it complies with all country laws, regulations and international compliance requirements.

ICT risk

Risk associated with the use of Information and Communication Technology to support business processes/standards. ICT risk results from inadequate or failed ICT Strategy, ICT Project and Program or ICT Operations. The Bank has robust checks in place to limit its exposure to ICT risk and performs regular monitoring to validate the efficacy of its ICT risk controls.

Reputational risk

The risk that an activity, action or stance taken by the Bank's officials will impair its image in the community and/or the long-term trust placed in the bank by its stakeholders resulting in the loss of business or the threat or legal action. The bank has stringent reputation risk controls in place including very tight controls on corporate communications and messaging.

Procyclicality Risk

The risk that associate with the tendency of financial variables to fluctuate around a trend during the economic cycle. The tendency of risk measurement to overestimate future risk in times of crises, while under estimate it in a normal time this is a major problem that all financial institution including bank must manage. The bank required to provide substantial capital aftermath of financial crises but far less capital to search crises. Hence Bank require to evaluate their risk bases on probabilistic and Statistical models from which risk measure are estimated.

Shariah Compliance Risk

Is the possibility that financial services or product will not be in compliance with established Shariah principle and standards, financial products and services that designed especial for Islamic financial market place are distinguished from their conventional counter party by compliance with shariah precepts and principals while this product may appear similar to conventional financial products and services particularly from an economic perspective. The contractual under pinning the product and services to comply with shariah.

17. KEY STRENGTH AND RESOURCES

The bank continues to give its top priority to key resources which are people and technology which gives us strength in service delivery, productivity and financial strength.

The bank has skilled and experienced employees who are considered as a key resource in pursuing its business objectives and continues to encourage open and honest communication in decision making.

Information and Communication Technology (ICT) is an enabler in service delivery. This is the reason why the bank continued to invest in advanced technology so as to realize operational excellence and better service delivery to our customers. In 2022 the bank continued with fine-tuning of the new core Banking system to support business growth and innovation.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

18. CRITICAL ACCOUNTING POLICIES AND JUDGEMENTS

Results of the bank are sensitive to the accounting policies, assumptions and estimates that underlie the preparation of the financial statements. When preparing the financial statements, it is the Directors' responsibility under the Companies Act 2002 to select suitable accounting policies and to make judgments and estimates that are reasonable and prudent.

The accounting policies that are deemed critical to our results and financial position, in terms of the materiality of the items to which the policies are applied and the high degree of judgment involved, including the use of assumptions and estimation, are described in notes 5 and 6 to the Financial Statements.

19. STRATEGIC OBJECTIVES

The financial year 2022 was the second period for the current five years' implementation rolling strategic plan which covering the period from 2021 to 2025, the strategic implementation accomplished with the main focus for five years' period was expansion of business in Zanzibar and mainland Tanzania enhancement of electronic channel transactions by issuing VISA card, agency banking improvements, mobile Banking and internet Banking. Improving service delivery to customer by opening two new service center at Dar es Salaam (kigamboni and Tandika), finishing of two branches at Dodoma (start to operate in January 2022) and Tandahimba service center at Mtwara region, the mission was well accomplished for the period.

20. STRATEGIC OBJECTIVES

The main focus of the Bank is to provide the valued financial services to customers and other stakeholders by using the following strategic goals;

- 1. Becoming a leader in Islamic banking
- 2. Make PBZ a reliable partner and customers' choice.
- 3. Corporate culture transformation

The strategy was in the form balance score card which focus on four perspectives

- Financial perspectives (Increase in assets utilization and improve Capital Adequacy level)
- Customer satisfactory (Maintain Sustainable Operation)
- Internal process (Develop and Maintain Business Continuity program)
- Organization capability (Improve organization and Individual Performance)

21. FUTURE PROSPECTS AND DEVELOPMENT PLANS

During the year 2022, the Bank aim to implement a new 5-year business strategy plan, the plan crafted to focus on use opportunities available in the market to expand customer base, to diversify and innovate attractive product and services, to enhance staff competence and morale, Development of infrastructural platforms to support service and product delivery, Implementation of aggressive marketing strategy and finally to Enhancement of business processes.

The Bank again aim to strengthen Digital and electronic channels, which targets to transform branch operations to improve customer experience and overall efficiency and reduce unnecessary Bank Hall crowd. The management has a strategy to enhance the quality of customers' services and experience

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

through alternative channels of services delivering. Technological advancement plan has opted to be most priority and to increase channel of services distribution during coming year. This will streamline the quality onto electronic service delivery in increasing customer's base.

22. FUTURE PROSPECTS AND DEVELOPMENT PLANS

According to the Bank's Strategic Business Plan (2021 – 2025), the Bank planned to accomplish various ongoing and future development projects/activities. Some activities planned within year 2023 are as following:

- Distribution of 1,000 POS for agency banking.
- · Acquisition of PBZ own financial Switch.
- Opening Morogoro and Mbeya branches. Construction of new seven service center (Amani, Konde, Nungwi, Paje, Zanzibar Airport Terminal III, Tunguu and Masasi).
- · Launching Tunguu service centers.
- Branch network expansion. (Arusha, Mwanza and Mbeya)
- Installation of new ATMs at various areas in Zanzibar and Tanzania Mainland.
- · Construction of training center.

MAISARA STREET POBOX 288 ANZIS B.

23. MARKET OVERVIEW

Zanzibar economy overview

Zanzibar economy continue to perform well, In December 2022, twelve-month headline inflation rose to 8.1 percent from 7.8 percent in the previous month and 2.4 percent in December 2021. The outturn was associated with the rise in prices of some food items, particularly maize and wheat flour, and rice. Food inflation increased to 12.7 percent in December 2022 from 11.6 percent and 0.0 percent in the preceding month and corresponding month in 2021, respectively. Nonfood inflation eased to 4.9 percent compared with 5.2 percent in November 2022, though rose relative to 4.2 percent registered in December 2021. On month-to-month basis, headline inflation also edged up to 0.8 percent from 0.4 percent recorded in both November 2022 and December 2021.

Tanzania economy overview

Global al supply chain disruption caused by war in Ukraine and after effects of Covid-19, continued to exert pressure on commodity prices, particularly food and energy. As a result, domestic inflation sustained an increasing trend since April 2022. However, headline inflation eased slightly to 4.8 percent in December 2022 from 4.9 percent in November 2022 on account of slowdown in prices of some non-food items. The rate was, however, higher than 4.2 percent registered in corresponding month in 2021. Worth noting, inflation is still within the country target of 5.4 percent for 2022/23 and in line with regional benchmarks.

24. TREASURY POLICY

The Bank maintains a well-documented treasury policy that outlines approved Treasury activities in the Bank and how various risks that arise from such dealings together with other Banking activities are identified, measured and managed. These, among others, include liquidity risk, foreign exchange risk and interest rate risk.

Regulatory ratios and internal limits on the above stated risks are stipulated in the policy to enable an efficient monitoring of compliance. Moreover, to combat any losses that may result from dealing

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

activities, the policy allows for establishment of dealer limits, counterparty limits and stop-loss limits that must be reviewed regularly and kept up to-date. In addition to this, roles and responsibilities of Treasury staff, Market Risk unit, senior management and Assets and Liabilities Committee (ALCO) members in complying with the policy are stated.

Assets and Liability Management (ALM) Policy covers a strategic management of the Bank's balance sheet and off-balance sheet items intending to achieve sustained growth, profitability and solvency. It involves a multiplicity of management activities and responsibilities, including the formulation of short and long-term strategic objectives and the management of inherent financial risks. Also It involves managing the mix of the Bank's balance sheet to attain maximum return within the Bank's risk appetite, while maintaining regulatory compliance. The ALM Policy highlights a set of actions and procedures designed to manage the Bank's financial risks in order to ensure competitive return on assets by putting in place specific predefined risk management policies.

(i) Liquidity Management

Liquidity Risk Management Policy provides guidance on management of liquidity risk under normal and stressed conditions. The policy prescribed a framework for making liquidity management decisions in the Bank, approaches to funding and liquidity operations, limits to liquidity risk exposures, regulatory compliance, reporting, controls and contingency funding planning.

The Bank's sound and robust liquidity management process, as carried out within the Bank and monitored by ALCO, encompasses the following:

- Day-to-day funding, managed by monitoring future cash flows to ensure that daily obligations
 can be met. This includes replenishment of funds as they mature or borrowed by customers.
 The Bank maintains an active presence in money markets to enable this to happen;
- Maintaining a portfolio of highly liquid and marketable securities that can easily be liquidated as protection against any unforeseen interruption to cash flows;
- Monitoring balance sheet liquidity ratios, i.e., Liquid Asset Ratio (LAR), Loan to Deposit Ratio (LDR) and Long-term Funding Ratio (LTFR) against internal and regulatory requirements;
- · Managing the concentration and profile of debt maturities;
- · Diversification of depositor base;
- · Performing Liquidity stress and scenario tests; and
- Maintaining a robust and effective contingency funding plan.

It is vital to know that changes in interest rates impact the overall profit of the Bank. Hence, in addition to liquidity management, the Bank manages its interest expenses through regular review of the fixed deposit rates and other savings accounts rates, together with striving to obtain reasonable and fair borrowing rates from the interbank and multilateral lenders.

26. TREASURY POLICY (CONTINUED)

(ii) Foreign Exchange risk

Foreign Exchange risk is a current or prospective exposure to earnings and capital arising from adverse movement in currency exchange rate. The Treasury policy mainly focuses on foreign exchange risk that arises from trading activities whose management principles are as outlined below;

i) Identification of foreign exchange risks in the trading and Banking book;

- ii) Risk appetite specification in the form of limits and triggers;
- iii) Breach management;
- iv) Price validation and profit recognition;

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

- v) Sign off of positions and profit or loss; and,
- vi) Reporting and management of foreign exchange risk.

The policy further outlines the roles and responsibilities of ALCO, Market risk unit and foreign exchange traders in managing this risk for the Bank.

(iii) Interest rate risk

Interest rate risk is the risk that arises from mismatches between the re-pricing dates on interest rate sensitive assets and liabilities in the normal course of business activities. Treasury policy explains the types of interest rate risk together with methods for measuring and managing it. The policy additionally outlines the roles and responsibilities of ALCO and Treasury in their involvement with managing the risk. All these are disclosed both internally via reports to ALCO (monthly) and Board Audit Risk and Compliance Committee (BARCC) on a quarterly basis and publicly through annual financial reports.

All borrowings have been disclosed under note 22 and 23 to the financial statements. Interest rate sensitivity analysis is disclosed under note 10.5.1

(iv) Contingency Funding Plan

Liquidity contingent plan puts down procedures of dealing with liquidity problem. It consists of a set of policies and procedures that serve as a blue print for PBZ to meet its funding needs in a timely manner and at a reasonable cost. It helps to ensure that PBZ prudently and efficiently.

Manages routine and extraordinary fluctuations in her liquidity.

The PBZ has developed a contingent liquidity plan that enables it to continuously meet its daily obligations when fall due. This plan is designed to ensure that the Bank could continuously maintain normal business operations.

25. RISK MANAGEMENT AND INTERNAL CONTROL

The Board accepts final responsibility for the risk management and internal control systems of the Bank. It is the task of management to ensure that adequate internal control and operational control systems are developed and maintained on an ongoing basis in order to provide reasonable assurance regarding:

- · The effectiveness and efficiency of operations;
- The safeguarding of the Bank's assets;
- Compliance with applicable laws and regulations;
- · The reliability of accounting records;

27 RISK MANAGEMENT AND INTERNAL CONTROL(CONTINUED)

- Business sustainability under normal as well as adverse conditions; and
- Responsible behaviors towards all stakeholders

The Board assessed the internal control systems throughout the year under review and is of the opinion that they met accepted criteria.

Taking risk is an integral part of any financial institution, and the operational risks are inevitable consequence of being in business. The Bank's aim is therefore, to achieve an appropriate balance between the risk and return and minimize potential adverse effects on the Bank's financial performance. The Board is responsible for identifying the major business risk faced by the Bank and to determine the appropriate course of action to manage those risks.

THE REPORT BY THOSE CHARGED WITH GOVERNANCE (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

Risk management is carried out by the department responsible for Risk and Compliance under policies approved by the Board of Directors. Internal Audit Department is responsible for the independent review of risk management and the control environment. The most core risks are credit risk, liquidity risk, interest risk, foreign currency risk and operational risks. The Board carries out risk and internal control assessment through Board Audit Committee.

28 GENDER PARITY AND STAFF STRENGTH

The Bank gives equal access to employment opportunities and ensures that the best available person is appointed to any given position free from discrimination of any kind and without regard to factors like gender, marital status, tribe, religion and disability which does not impair ability to discharge duties. As at 31 December 2022, the Bank had 489 staff 270 staff (55%) were males and 219 staff (45%) were females (2021: 502). STATEMENT OF DIRECTORS' RESPONSIBILITIES FOR THE YEAR ENDED 31 DECEMBER 2022

The Companies Act No 15 of 2013 requires the Directors to prepare financial statements for each financial period which present fairly, in all material respects, the state of financial affairs of the Bank as at the end of each financial year and of its profit or loss. It also requires the Directors to ensure that the Bank keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the bank. The Directors are also responsible for safeguarding the assets of the Bank and hence for taking reasonable steps for the prevention and detection of fraud, error and other irregularities.

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards (IFRS) and the requirements of the Companies Act No 15 0f 2013 and the Banking and Financial Institutions Act, 2006. The Directors are of the opinion that the financial statements present fairly, in all material respects, the state of the financial affairs of the bank and of its profit.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

The Directors have made an assessment of the bank ability to continue as a going concern. Nothing has come to the attention of the directors to indicate that the group will not remain a going concern for at least twelve months from the date of this statement.

DECLARATION OF THE HEAD OF FINANCE FOR THE YEAR ENDED 31 DECEMBER 2022

The National Board of Accountants and Auditors (NBAA) according to the power conferred to it under the Auditors and Accountants (Registration) Act No. 33 of 1972, as amended by Act No. 2 of 1995, requires financial statements to be accompanied with a declaration issued by Head of Finance/Accounting responsible for the preparation of the financial statements of the entity concerned.

It is the duty of a Professional Accountant to assist the Board of Directors to discharge the responsibility of preparing financial statements of an entity showing a true and fair view of the entity's position and performance in accordance with International Financial Reporting Standards and the requirements of the Companies Act No 15 of 2013, the Companies Act, No.12 of 2002 and the Banking and Financial Institutions Act, 2006. Full legal responsibility for the preparation of financial statements rests with the Board of Directors as stated under the Statement of Directors' Responsibilities on the previous page.

I, CPA Anwar A. Saleh being the Director of Finance of People's Bank of Zanzibar Limited hereby acknowledge my responsibility of ensuring that the financial statements for the year ended 31 December 2022 have been prepared in compliance with International Financial Reporting Standards and the requirements of the Companies Act No 15 of 2013 and the Banking and Financial Institutions Act, 2006.

I, thus confirm that the financial statements give a true and fair view of the financial position and results of operations of People's Bank of Zanzibar Limited as on that date and for the period then ended, and that the financial statements have been prepared based on properly maintained financial records.

REPORT OF INDEPENDENT AUDITOR FOR THE YEAR ENDED 31 DECEMBER 2022

To: Shareholders,
People's Bank of Zanzibar Limited (PBZ),
PO Box 1173,
Zanzibar.

RE: REPORT OF THE CONTROLLER AND AUDITOR GENERAL ON THE BANK FINANCIAL STATEMENTS OF PEOPLE'S BANK OF ZANZIBAR LIMITED (PBZ) FOR THE YEAR ENDED 31 DECEMBER 2022.

Report on the financial statements

My Opinion

In my opinion, Bank financial statements give a true and fair view of the Bank's financial position of People's Bank of Zanzibar Limited (PBZ) as at 31 December 2022 and its Bank financial performance and Bank cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Tanzanian Companies Act, CAP 212 Act No. 12 of 2002, Zanzibar Companies Act No 15 of 2013 and the Banking and Financial Institutions Act, 2006.

What I have audited

I have audited the Bank's financial statements of the People's Bank of Zanzibar Limited (PBZ) which comprise of:

- The Bank statements of financial position as at 31st December 2022;
- The Bank statement of comprehensive income for the year then ended;
- The Bank statement of changes in equity for the year then ended;
- The Bank statement of cash flows for the year then ended; and
- The notes to the financial statements, which include a summary of significant accounting policies and other explanatory information.

Basis of opinion

I conducted my audit in accordance with International Standards of Supreme Audit Institutions (ISSAIs). My responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the Bank financial statements section of my report.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Independence

I am independent of the Group and Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the National Board of Accountants and Auditors (NBAA) Code of Ethics, and I have fulfilled my other ethical responsibilities in accordance with these requirements.

REPORT OF INDEPENDENT AUDITOR FOR THE YEAR ENDED 31 DECEMBER 2022

Report on the financial statements (Continued)

Kev Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the Bank financial statements of the current period. These matters were addressed in the context of my audit of the Bank financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Key Audit Matter Impairment of loans and advance and financing to customers

As at 31 December 2022, the provision for

impairment on loans and financing to customers at Amortized Cost is TZS 9,736,020 (2021: TZS 8,831,891). This represents the estimation of expected losses at the year end.

The determination of appropriate provisions for impairment is a key audit matter as it requires management judgement, is subject to estimation uncertainty and relies on available data.

Areas which involve judgement and estimates include determination of probability of default (PDs), exposure amount given default (EAD) and ascertaining of future cash flows which the

bank will obtain when realizing the assets pledged as collaterals.

There is a risk that the provision for impairment of financial assets does not represent a complete and accurate estimate of expected losses and that the carrying value of these items is misstated.

This includes the risk that the ECL model is not in compliance with IFRS 9.

The accounting policy and key sources of estimation uncertainty in relation to financial asset impairment provisions are disclosed in Note 7 to the financial statements.

How my audit addressed the key audit matter My audit procedures included:

- I undertook an assessment of the Bank's provisioning methodology and compared it with the requirements of IFRS 9;
- I reviewed the application of the business model to existing portfolios and reviewed the results of the Solely Payments of Principal and
- Interest test for relevant financial instruments.
- I evaluated the design and operating effectiveness of the Bank's controls and IT controls around credit management, ECL model and provision assessment.
- I tested key controls over completeness and accuracy of data inputs to loan loss provisioning.
- I assessed management's assumptions in relation 'significant increase in credit risk' and the allocation of loans to various categories based on the levels of risks; The management is required to estimate probability and exposures at default. This involves consideration of certain factors including macro-economic variables such as inflation and economic growth.
- I tested a sample of loans to ensure that they have been included in the correct stage/buckets depending on the risk profiles of the customers in accordance with the Bank's methodology and IFRS 9; and,
- I reviewed the IFRS 9 and IFRS 7 disclosures for adequacy and compliance with the amendments relating to IFRS 9.

REPORT OF INDEPENDENT AUDITOR (CONTINUED)

FOR THE YEAR ENDED 31 DECEMBER 2022 AUDIT REPORT ON THE FINANCIAL STATEMENTS

Other information

The directors are responsible for the other information. The other information comprises with List of Abbreviations, Corporate Information, Directors' Report, Statement of Directors' Responsibilities and the Declaration by the Head of Finance but does not include the Bank's financial statements and my auditor's report thereon.

My opinion on the Bank financial statements does not cover the other information and I do not express any form of assurance conclusion thereon. In connection with my audit of the Bank financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Bank financial statements, or my knowledge obtained in the audit.

If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

Responsibilities of the Directors for the Bank Financial Statements

The Directors are responsible for the preparation and fair presentation of the Bank financial statements in accordance with International Financial Reporting Standards and the requirements of the Tanzanian Companies Act, CAP 212 Act No. 12 of 2002, Zanzibar Companies Act No 15 of 2013 and the Banking and Financial Institutions Act, 2006, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Bank financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for overseeing the Bank's financial reporting process.

Responsibilities of the Controller and Auditor General

My objectives are to obtain reasonable assurance about whether the Bank financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Bank financial statements.

As part of an audit in accordance with ISAs, I exercise professional judgement and maintain professional skepticism throughout the audit. I also:

Identify and assess the risks of material misstatement of the Bank financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is

REPORT OF INDEPENDENT AUDITOR (CONTINUED)

FOR THE YEAR ENDED 31 DECEMBER 2022 AUDIT REPORT ON THE FINANCIAL STATEMENTS

Responsibilities of the Controller and Auditor General (Continued)

higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on the effectiveness of the Bank's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors;
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions.
- May cause the Bank to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the Bank financial statements, including the disclosures, and whether the Bank financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank to express an opinion on the financial statements. I am responsible for the direction, supervision and performance of the Bank audit. I remain solely responsible for my audit opinion.

I communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the Directors with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the Directors, I determine those matters that were of most significance in the audit of the Bank financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2022

1. CORPORATE INFORMATION

Principal

The People's Bank of Zanzibar Limited (the Bank), provides retail and corporate Banking services in Tanzania and beyond through internet Banking and international remittance services registered under the Banking and Financial Institutions Act, 2006. The People's Bank of Zanzibar Limited (the Bank) is a limited liability company incorporated in 1966 under the Zanzibar Companies Decree (Cap. 153) which has been repealed and replaced by Companies Act No.15 of 2013 domiciled in Zanzibar. The Bank is fully owned by the Revolutionary Government of Zanzibar. Its registered office is at Mpirani Street, ZIC Building.

Subsidiary

The Bank was first incorporated in Tanzania under the Companies Act 2002, Cap 212, as a limited liability company in June 1999. Due to expansion of its operational area and shareholding base, the name was changed from Mufindi Community Bank to MuCoBa Bank Public Limited Company. The name was changed with effect from May 29, 2014. The Bank was listed in Dar es Salaam Stock Exchange (DSE) on June 8, 2016.

2. BASIS OF PREPARATION

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB). The financial statements are prepared on a historical cost basis except where otherwise stated or as required by International Financial Reporting Standards (IFRSs) and Interpretations to those Standards for assets and liabilities to be stated at their fair value as disclosed in the accounting policies hereafter. The financial statements are presented in Tanzania Shillings (TZS) except where explicitly stated. All values are rounded to the nearest thousand (TZS '000).

3. STATEMENT OF COMPLIANCE

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB. The financial statements also comply with the Tanzanian Companies Act, 2002, Zanzibar Companies Act No.15 of 2013 and the Banking and Financial Institutions Act, 2006.

4. PRESENTATION OF FINANCIAL STATEMENTS

The Bank presents its statement of financial position in order of liquidity based on the Bank's intention and perceived ability to recover/settle the majority of assets/liabilities of the corresponding financial statement line item. The Bank analyzed recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current). Financial assets and financial liabilities are generally reported gross in the statement of financial position except when IFRS netting criteria are met.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

5. CHANGES IN ACCOUNTING POLICY AND DISCLOSURES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

5.1 New and amended standards and interpretations

The following standards have been adopted by the Bank for the first time for the financial year beginning in 1 January 2021:

Number	Effective date	Executive summary
Amendments to IFRS 9 'Financial Instruments', IAS 39 'Financial Instruments: Recognition and Measurement', IFRS 7 'Financial Instruments: Disclosures', IFRS 4 'Insurance Contracts' and IFRS 16 'Leases' – interest rate benchmark (IBOR) reform (Phase 2).	Annual periods beginning on or after 1 January 2021. (Published August 2020)	The Phase 2 amendments address issues that arise from the implementation of the reform of an interest rate benchmark, including the replacement of one benchmark with an alternative one.
IFRS 16, 'Leases' COVID- 19-Related rent Concessions Amendment	Annual periods beginning on or after 1 June 2020 (early adoption is permitted). (Published June 2020).	The IASB has provided lessees (but not lessors) with relief in the form of an optional exemption from assessing whether a rent concession related to COVID-19 is a lease modification, provided that the concession meets certain conditions. Lessees can elect to account for qualifying rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as a variable lease payment.

40

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

5. CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (CONTINUED)

5.2 New and amended standards issued but not yet effective

Number	Effective date	Executive summary
IFRS 17, 'Insurance contracts'	Annual periods beginning on or after 1 January 2023. Early application is permitted for entities that apply IFRS 9, 'Financial Instruments', and IFRS 15, 'Revenue from Contracts with Customers', at or before the date of initial application of IFRS 17.	The IASB issued IFRS 17, 'Insurance contracts', and thereby started a new epoch of accounting for insurers. Whereas the current standard, IFRS 4, allows insurers to use their local GAAP, IFRS 17 defines clear and consistent rules that will significantly increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and on key performance indicators.
	(Published May 2017)	Under IFRS 17, the general model requires entities to measure an insurance contract at initial recognition at the total of the fulfilment cash flows (comprising the estimated future cash flows, an adjustment to reflect the time value of money and an explicit risk adjustment for non-financial risk) and the contractual service margin. The fulfilment cash flows are remeasured on a current basis each reporting period. The unearned profit (contractual service margin) is recognized over the coverage period.
		Aside from this general model, the standard provides, as a simplification, the premium allocation approach. This simplified approach is applicable for certain types of contract, including those with a coverage period of one year or less.
	TROLLER 44	For insurance contracts with direct participation features, the variable fee approach applies. The variable fee approach is a variation on the general model. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the contractual service margin. As a consequence, the fair value changes are not recognized in profit or loss in the period in which they occur but over the remaining life of the contract. The Bank is currently in the process of assessing the impact of adopting IFRS 17 on its financial statements.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

5. CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (CONTINUED)

5.2 New and amended standards issued but not yet effective (Continued)

Number	Effective date	Executive summary
Amendments to IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' on Onerous Contracts—Cost of Fulfilling a Contract.	Annual periods beginning on or after 1 January 2022 (Published May 2020)	The amendment clarifies which costs an entity includes in assessing whether a contract will be loss-making. This assessment is made by considering unavoidable costs, which are the lower of the net cost of exiting the contract and the costs to fulfil the contract. The amendment clarifies the meaning of 'costs to fulfil a contract'. Under the amendment, costs to fulfil a contract include incremental costs and the allocation of other costs that relate directly to fulfilling the contract.
Annual improvements cycle 2018 -2020	Annual periods beginning on or after 1 January 2022 (Published May 2020)	These amendments include minor changes to: • IFRS 1, 'First time adoption of IFRS' has been amended for a subsidiary that becomes a first-time adopter after its parent. The subsidiary may elect to measure cumulative translation differences for foreign operations using the amounts reported by the parent at the date of the parent's transition to IFRS. IFRS 9 Financial Instruments – Fees in the '10 per cent' test for de-recognition of financial liabilities. IFRS 9, 'Financial Instruments' has been amended to include only those costs or fees paid between the borrower and the lender in the calculation of "the 10% test" for de-recognition of a financial liability. Fees paid to third parties are excluded from this calculation. The Bank will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual period in which it will first apply the amendment and does not expect this will result in a material impact on its financial statements. • IFRS 16, 'Leases', amendment to the Illustrative Example 13 that accompanies IFRS 16 to remove the illustration of payments from the lessor relating to leasehold improvements. The amendment intends to remove any potential confusion about the treatment of lease incentives.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

5. CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (CONTINUED)

5.2 New and amended standards issued but not yet effective (Continued)

Number	Effective date	Executive summary
Amendment to IAS 1 'Presentation of Financial Statements' on Classification of Liabilities as Current or Non- current.	Annual periods beginning on or after 1 January 2022 (Published Jan 2020)	The amendment clarifies that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by expectations of the entity or events after the reporting date (for example, the receipt of a waiver or a breach of covenant).

6. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied by the Bank have been approved by the Board of Directors of the Bank and in accordance with International Financial Reporting Standards (IFRSs) promulgated by the International Accounting Standards Board. The major accounting policies adopted, which are consistent with those used in the previous financial year, except for the amendments to IFRSs effective as of 1 January 2019 as disclosed below and applied by the Bank are summarized below.

6.1 Foreign currency translation

a) Functional and presentation currency

The financial statements are presented in Tanzania Shillings (TZS). Items included in the financial statements are measured using that functional currency. Transactions in foreign currencies are initially recorded at the functional currency rate of exchange ruling at the date of the transaction.

b) Transactions and balances

Transactions in foreign currencies during the year are converted into Tanzanian Shillings using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

6.2 Recognition of interest income

6.2.1 The effective interest rate method

Under IFRS 9, interest income is recorded using the EIR method for all financial assets measured at amortized cost, interest rate derivatives for which hedge accounting is applied and the related amortization/recycling effect of hedge accounting. Interest income on interest bearing financial assets measured at FVOCI under IFRS 9 is also recorded using the EIR method. Interest expense is also calculated using the EIR method for all financial liabilities held at amortized cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or liability or, when appropriate, a shorter period, to the gross carrying amount of the financial asset.

PUDITOR

OF

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.2 Recognition of interest income (Continued)

6.2.1 The effective interest rate method (Continued)

The EIR (and therefore, the amortized cost of the financial asset) is calculated by taking into account transaction costs and any discount or premium on the acquisition of the financial asset, as well as fees and costs that are an integral part of the EIR. The Bank recognizes interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, the EIR calculation also takes into account the effect of potentially different interest rates that may be charged at various stages of the financial asset's expected life, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations of fixed rate financial assets' or liabilities' cash flows are revised for reasons other than credit risk, then changes to future contractual cash flows are discounted at the original EIR with a consequential adjustment to the carrying amount. The difference from the previous carrying amount is booked as a positive or negative adjustment to the carrying amount of the financial asset or liability on the balance sheet with a corresponding increase or decrease in Interest revenue/expense calculated using the effective interest method.

For floating-rate financial instruments, periodic re-estimation of cash flows to reflect the movements in the market rates of interest also alters the effective interest rate, but when instruments were initially recognized at an amount equal to the principal, re-estimating the future interest payments does not significantly affect the carrying amount of the asset or the liability.

6.2.2 Interest and similar income and expense

Net interest income comprises interest income and interest expense calculated using both the effective interest method and other methods. These are disclosed separately on the face of the profit or loss for both interest income and interest expense to provide symmetrical and comparable information.

In its Interest income/expense calculated using the effective interest method, the Bank only includes interest on those financial instruments that are set out in Note 6.2.1 above.

Other interest income/expense includes interest on derivatives in economic hedge relationships and all financial assets/liabilities measured at FVPL, other than those held for trading, using the contractual interest rate.

Interest income/expense on all trading financial assets/liabilities is recognized as a part of the fair value change in 'Net trading income'.

The Bank calculates interest income on financial assets, other than those considered creditimpaired, by applying the EIR to the gross carrying amount of the financial asset.

When a financial asset becomes credit-impaired and is therefore regarded as 'Stage 3', the Bank calculates interest income by applying the EIR to the net amortized cost of the financial asset. If the financial asset cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

OF

MARISAR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.2 Recognition of interest income (Continued)

6.2.2 Interest and similar income and expense (Continued)

For purchased or originated credit-impaired (POCI) financial assets, the Bank calculates interest income by calculating the credit-adjusted EIR and applying that rate to the amortized cost of the financial asset. The credit-adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortized cost of the POCI financial asset.

6.3 Fee and commission income

The Bank earns fee and commission income from a diverse range of financial services it provides to its customers. Fee and commission income is recognized at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services.

The performance obligations, as well as the timing of their satisfaction, are identified, and determined, at the inception of the contract. The Bank's revenue contracts do not typically include multiple performance obligations, as explained further in 6.3.1 and 6.3.2 below.

When the Bank provides a service to its customers, consideration is invoiced and generally due immediately upon satisfaction of a service provided at a point in time or at the end of the contract period for a service provided over time (unless otherwise specified in 6.3.1 and 6.3.2 below).

The Bank has generally concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer.

6.3.1 Fee and commission income from providing services where performance obligations are satisfied at a point in time

Services provided where the Bank's performance obligations are satisfied at a point in time are recognized once control of the services is transferred to the customer. This is typically on completion of the underlying transaction or service or, for fees or components of fees that are linked to a certain performance, after fulfilling the corresponding performance criteria. These include fees and commissions arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement/participation or negotiation of the acquisition of shares or other securities, or the purchase or sale of businesses, brokerage and underwriting fees.

The Bank typically has a single performance obligation with respect to these services, which is to successfully complete the transaction specified in the contract.

Performance obligations satisfied over time include asset management, custody and other services, where the customer simultaneously receives and consumes the benefits provided by the Bank's performance as the Bank performs.

40

OFFICE

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.3 Fee and commission income (Continued)

6.3.2 Contract balances

The following are recognized in the statement of financial position arising from revenue from contracts with customers:

- Fees and commissions receivables included under 'Other assets', which represent the Bank's
 right to an amount of consideration that is unconditional (i.e., only the passage of time is
 required before payment of the consideration is due). These are measured at amortized cost
 and subject to the impairment provisions of IFRS 9.
- Unearned fees and commissions included under 'Other liabilities', which represent the Bank's
 obligation to transfer services to a customer for which the Bank has received consideration
 (or an amount of consideration is due) from the customer. A liability for unearned fees and
 commissions is recognized when the payment is made or the payment is due (whichever is
 earlier). Unearned fees and commissions are recognized as revenue when (or as) the Bank
 performs.

6.4 Net trading income

Net trading income includes all gains and losses from changes in fair value and the related interest income or expense and dividends, for financial assets and financial liabilities held for trading. This includes any ineffectiveness recorded on hedging transactions.

6.5 Net loss on financial assets and liabilities designated at fair value through profit or loss

Net loss on financial instruments at FVTPL represents non-trading derivatives held for risk management purposes used in economic hedge relationship but not qualifying for hedge accounting relationships, financial assets and financial liabilities designated as at FVTPL and also non-trading assets measured at FVTPL, as required by or elected under IFRS 9. The line item includes fair value changes, interest, dividends and foreign exchange differences.

6.6 Net loss on de-recognition of financial assets measured at amortized cost or FVOCI

Net loss on de-recognition of financial assets measured at amortized cost includes loss (or income) recognized on sale or de-recognition of financial assets measured at amortized costs calculated as the difference between the book value (including impairment) and the proceeds received.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.7 Financial instruments - initial recognition

6.7.1 Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognized on the trade date, i.e., the date on which the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades, i.e., purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognized when funds are transferred to the customers' accounts. The Bank recognizes balances due to customers when funds are transferred to the Bank.

6.7.2 Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments, as described in Notes 6.9.1.1 and 6.9.1.2. Financial instruments are initially measured at their fair value (as defined in Note 6.8), except in the case of financial assets and financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price. When the fair value of financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss, as described below.

6.7.3 Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Bank recognizes the difference between the transaction price and fair value in net trading income. In those cases, where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognized in profit or loss when the inputs become observable, or when the instrument is derecognized.

6.7.4 Measurement categories of financial assets and liabilities

The Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortized cost, as explained in Note 6.9.1
- FVOCI, as explained in Notes 6.9.4 and 6.9.5
- FVTPL, as set out Note 6.9.7.

The Bank classifies and measures its derivative and trading portfolio at FVPL, as explained in Notes 6.9.2 and 6.9.3. The Bank may designate financial instruments at FVPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies, as explained in Note 6.9.7.

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortized cost or at FVPL when they are held for trading and derivative instruments or the fair value designation is applied, as explained in Note 6.9.7.

UL O

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.7 Financial instruments – initial recognition

6.8 Fair Value Measurement

The Bank measures financial instruments, such as derivatives, and non-financial Assets, such as land and buildings, at fair value at each reporting date. Also, fair values of financial instruments measured at amortized cost are disclosed in note 8. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either: In the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal market or the most advantageous market must be accessible by the Bank.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

When one is available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable Information on the Bank's fair value hierarchy is provided in note 8.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - that is, the fair value of the consideration given or received. If the Bank determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price.

Subsequently, that difference is recognized in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Bank measures assets and long positions at a bid price and liabilities and short positions at an ask price. The fair value of a financial liability with a demand feature (for example, a demand deposit) is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial assets and liabilities 6.9

Deposits from Banks, Loans and advances/IB Financing to customers, Financial investments at amortized cost

The Bank Measures Due from Banks, Loans and advances to customers and other financial investments at amortized cost only if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding. The details of these conditions are outlined below.

6.9.1.1 Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective:

- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)

The expected frequency, value and timing of sales are also important aspects of the Bank's assessment. The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

The SPPI test

As a second step of its classification process the Bank assesses the contractual terms of the financial asset to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount). The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set. In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL. ROLLERAND ROTION

0

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

- 6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
- 6.9 Financial assets and liabilities (continued)
- 6.9.1 Deposits from Banks, Loans and advances/IB Financing to customers, Financial investments at amortized cost (continued)
- 6.9.1.1 Business model assessment (continued)

Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument
 price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit
 index, or other variable, provided that, in the case of a non-financial variable, it is not specific
 to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- · It is settled at a future date.

The Bank enters into derivative transactions with various counterparties. These include interest rate swaps, futures, credit default swaps, cross-currency swaps, forward foreign exchange contracts and options on interest rates, foreign currencies and equities. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Fully collateralized derivatives that are settled net in cash on a regular basis are only recognized to the extent of the overnight outstanding balance. Changes in the fair value of derivatives are included in net trading income unless hedge accounting is applied.

Embedded derivatives

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative cause some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract. A derivative that is attached to a financial instrument, but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a separate financial instrument.

Derivatives embedded in financial liability or a non-financial host are separated from the host and accounted for as separate derivatives if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative (as defined above); and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

- 6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
- 6.9 Financial assets and liabilities (continued)

6.9.2 Financial assets or financial liabilities held for trading

The Bank classifies financial assets or financial liabilities as held for trading when they have been purchased or issued primarily for short-term profit-making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading assets and liabilities are recorded and measured in the statement of financial position at fair value. Changes in fair value are recognized in net trading income. Interest and dividend income or expense is recorded in net trading income according to the terms of the contract, or when the right to payment has been established.

Included in this classification are debt securities, equities, short positions and customer loans that have been acquired principally for the purpose of selling or repurchasing in the near term.

6.9.3 Debt instruments at FVOCI

The Bank classifies debt instruments at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognized in OCI. Interest income and foreign exchange gains and losses are recognized in profit or loss in the same manner as for financial assets measured at amortized cost as explained in Note 6.2.2. The ECL calculation for Debt instruments at FVOCI is explained in Note 6.12.4. Where the Bank holds more than one investment in the same security, they are deemed to be disposed of on a first—in first—out basis. On de-recognition, cumulative gains or losses previously recognized in OCI are reclassified from OCI to profit or loss.

The Bank invested in Debt instruments at FVOCI (Debt security) representing borrowed fund by Government through BOT. The Bank classifies and measured these investments in debt securities; Government bonds and Treasury bonds at amortized cost.

6.9.4 Equity instruments at FVOCI

Upon initial recognition, the Bank occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of definition of Equity under IAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by- instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognized in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.9 Financial assets and liabilities (continued)

6.9.5 Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortized cost. Amortized cost is calculated by taking into account any discount or premium on issued funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date.

6.9.6 Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument-by-instrument basis:

 The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognizing gains or losses on them on a different basis

Or

 The liabilities are part of a group of financial liabilities, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy

Or

The liabilities contain one or more embedded derivatives, unless they do not significantly
modify the cash flows that would otherwise be required by the contract, or it is clear with little
or no analysis when a similar instrument is first considered that separation of the embedded
derivative(s) is prohibited.

Financial assets and financial liabilities at FVPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVPL due to changes in the Bank's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVPL is recorded using the contractual interest rate, as explained in Note 6.2.2. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other operating income when the right to the payment has been established.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.9 Financial assets and liabilities (continued)

6.9.7 Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees are initially recognized in the financial statements (within Provisions) at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognized less cumulative amortization recognized in the profit or loss, and an ECL allowance.

The premium received is recognized in the profit or loss in Net fees and commission income on a straight-line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements. The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded on in the statement of financial position.

6.9.8 Reclassification of financial assets and liabilities

The Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

6.9.9 Derecognition of financial assets and liabilities

6.9.9.1 Derecognition due to substantial modification of terms and conditions

The Bank derecognizes a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognized as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded.

The newly recognized loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be POCI.

When assessing whether or not to derecognize a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, as set out below, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

- 6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
- 6.9 Financial assets and liabilities (continued)
- 6.9.9 Derecognition of financial assets and liabilities (continued)

6.9.9.1 Derecognition due to substantial modification of terms and conditions (continued)

For financial liabilities, the Bank considers a modification substantial based on qualitative factors and if it results in a difference between the adjusted discounted present value and the original carrying amount of the financial liability of, or greater than, ten percent. For financial assets, this assessment is based on qualitative factors

6.10 Credit losses and Impairment of financial assets

The Bank recognizes a loss allowance for expected credit losses (ECLs) on the following items:

- financial assets measured at amortized cost (including term loan and IB financing to customers, due from Banks, revolving facilities and financial instruments at amortized cost)
- Guarantee contract and letter of credit commitment
- Undrawn overdrafts commitments
- debt securities measured at FVOCI
- Other assets in scope of IFRS 9 including Salary advance to staff

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Bank in accordance with the contract and the cash flows that the Bank expects to receive).

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.10 Credit losses and Impairment of financial assets (continued)

6.10.1 Overview of the ECL principles

The Bank records an allowance for expected credit loss for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit losses or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit losses (12m ECL).

The 12m ECL is the portion of LTECLs that represent the ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECL and 12mECL are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by

considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- Stage 1: When loans are first recognized, the Bank recognizes an allowance based on 12m ECL. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECL. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- Stage 3: Loans considered credit-impaired. The Bank records an allowance for the LTECL.
- POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognized based on a credit-adjusted EIR. The ECL allowance is only recognized or released to the extent that there is a subsequent change in the expected credit losses.

6.10 Credit losses and Impairment of financial assets (continued)

6.10.1 Overview of the ECL principles (continued)

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

6.10.2 The calculation of ECL

The Bank calculates ECL based on four probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral or credit enhancements that are integral to the loan and not required to be recognized separately, as set out in Note 6.10.2 It is usually expressed as a percentage of the EAD.

When estimating the ECL, the Bank considers four scenarios (a base case, an upside, a mild downside ('downside 1') and a more extreme downside ('downside 2')). Each of these is associated with different PDs, EADs and LGDs, as set out in Note 6.10.2 When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

6.10 Credit losses and Impairment of financial assets (continued)

6.10.2 The calculation of ECL (continued)

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out in Note 6.12.5, the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as an adjustment of the financial asset's gross carrying value. The mechanics of the ECL method are summarized below:

- Stage 1: 12m ECL is calculated as portion of LTECL that represent ECL that result from default events on a financial instrument that are possible within 12 months after reporting date. The Bank calculates the 12m ECL allowance based on expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by expected LGD and discounted by an approximation to the original EIR. This calculation is made for each of four scenarios, as explained above.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECL. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- Stage 3: For loans considered credit-impaired, the Bank recognizes the lifetime ECL for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- POCI: POCI assets are financial assets that are credit impaired on initial recognition.
 The Bank only recognizes the cumulative changes in lifetime ECL since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit adjusted EIR.
- Loan When estimating LTECL for undrawn loan commitments, Bank estimates commitments expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on PV of the expected shortfalls in cash

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

letters of flows if the loan is drawn down, based on a probability-weighting of four scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. For revolving facilities that include both a loan and an undrawn commitment, ECL is calculated and presented together with the

Financial guarantee contracts

The Bank's liability under each guarantee is measured at the higher of the amount initially recognized less cumulative amortization recognized in the profit or loss, and the ECL provision. For this purpose, the Bank estimates ECL based on the PV of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the four scenarios.

6.10 Credit losses and Impairment of financial assets (continued)

6.10.3 ECL Provision and Regulatory Risk Reserve

In the event where the computed ECL provisions as explained in Note 6.12.2 above are less than those calculated as per BOT regulatory requirements, a Regulatory Risk Reserve (non-distributable reserve) shall be created and credited through Retained Earning to eliminate the shortfall. And where the ECL provisions are higher than provision as per BOT regulations, any credit outstanding in a Regulatory Risk Reserve account shall be liquidated to Retained Earning account.

6.10.4 Debt instruments measured at fair value through OCI

The ECL for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortized cost is recognized in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognized in OCI is recycled to the profit and loss upon derecognition of the assets.

6.10.5 Purchased or originated credit impaired financial assets (POCI)

For POCI financial assets, the Bank only recognizes the cumulative changes in LTECL since initial recognition in the loss allowance.

6.10.6 Credit cards and other revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure to credit losses to the contractual notice period, but instead calculates ECL over a period that reflects its expectations of customer behavior, the likelihood of default and its future risk mitigation procedures, which could include reducing or cancelling the facilities. Based on past experience and the Bank's expectations, the period over which the Bank calculates ECL for these products, is five years for corporate and seven years for retail products.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, but greater emphasis is also given to qualitative factors such as changes in usage.

The interest rate used to discount the ECL for credit cards is based on the average effective interest rate that is expected to be charged over the expected period of exposure to the facilities. This

estimation takes into account that many facilities are repaid in full each month and are consequently not charged interest.

The calculation of ECL, including the estimation of the expected period of exposure and discount rate is made on an individual basis for corporate and on a collective basis for retail products. The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

6.10 Credit losses and Impairment of financial assets (continued)

6.10.7 Forward looking information

In its ECL models, the Bank relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Unemployment rates
- · Central Bank base rates
- House price indices

The inputs and models used for calculating ECL may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

6.11 Credit enhancements: collateral valuation and financial guarantees

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position.

Cash flows expected from credit enhancements which are not required to be recognized separately by IFRS standards and which are considered integral to the contractual terms of a debt instrument which is subject to ECL, are included in the measurement of those ECL. On this basis, the fair value of collateral affects the calculation of ECL. Collateral is generally assessed, at a minimum, at inception and re-assessed on a quarterly basis. However, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, or based on housing price indices.

Guarantees held are included in the measurement of loan ECLs when either they are specified in the contractual terms of the loan or else are integral to the loan, in that they formed part of the basis on which the loan was extended.

Guarantees that are not integral to the loan's contractual terms are accounted as separate units of accounts subject to ECL. Credit default swaps are not considered to be integral to a loan's contractual terms and are accounted as derivative financial instruments, as set out in Note 6.9.2.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.12 Collateral repossessed

The Bank's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Bank's policy.

In its normal course of business, the Bank engages external agents to recover funds from the repossessed assets, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the balance sheet.

6.13 Write-offs

Financial assets are written off either partially or in their entirety only when the Bank has no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

6.14 Forborne and modified loans

The Bank sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. The Bank considers a loan forborne when such concessions or modifications are provided as a result of the borrower's present or expected financial difficulties and the Bank would not have agreed to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department.

Forbearance may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Bank's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur. Derecognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected or written off.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.14 Forborne and modified loans (continued)

When the loan has been renegotiated or modified but not derecognized, the Bank also reassesses whether there has been a significant increase in credit risk. The Bank also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum 24-month probation period. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- · All of its facilities have to be considered performing
- The probation period of two years has passed from the date the forborne contract was considered performing
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period
- The customer does not have any contracts that are more than 30 days past due. If modifications are substantial, the loan is derecognized, as explained in Note 6.15.

6.15 Hedge accounting

As a part of its risk management, the Bank has identified a series of risk categories with corresponding hedging strategies using derivative instruments. As previously mentioned, the Bank elected, as a policy choice permitted under IFRS 9, to continue to apply hedge accounting in accordance with IAS 39. When a hedging relationship meets the specified hedge accounting criteria set out in IAS 39, the Bank applies one of three types of hedge accounting: fair value hedges; cash flow hedges; or hedges of a net investment in a foreign operation. Transactions that are entered into in accordance with the Bank's hedging objectives but do not qualify for hedge accounting, are referred to in these financial statements as economic hedge relationships.

At inception, the Bank formally documents how the hedging relationship meets the hedge accounting criteria. It also records the economic relationship between the hedged item and the hedging instrument, including the nature of the risk, the risk management objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship at inception and on an ongoing basis.

In order to qualify for hedge accounting, a hedge relationship must be expected to be highly effective on a prospective basis and it needs to be demonstrated that it was highly effective in the previous designated period (i.e., one month). A hedge is considered to be highly effective if the changes in fair value or cash flows attributable to the hedged risk are expected to be offset by the hedging instrument in a range of 80% to 125%. It is also necessary to assess, retrospectively, whether the hedge was highly effective over the previous one-month period. The hedge accounting documentation includes the method and results of the hedge effectiveness assessments.

When the hedged item is a forecast transaction, the Bank also assesses whether the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect the profit or loss. In addition to the above information, hedge documentation for such transactions also describes the nature and specifics of the forecast transactions and explains the Bank's rationale as to why it has concluded the transactions to be highly probable.

PUDITOR

10

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.16 Cash and cash equivalents

Cash and cash equivalents referred to in the statement of cash flows comprise cash on hand, non-restricted current accounts with BOT, deposits held at call with other Banks with an original maturity of three months or less and investments with maturity periods of three months or less in money market instruments.

6.17 Repurchase and reverse repurchase agreements

Securities sold under agreements to repurchase at a specified future date are not derecognized from the statement of financial position as the Bank retains substantially all of the risks and rewards of ownership. The corresponding cash received is recognized in the statement of financial position as an asset with a corresponding obligation to return it, including accrued interest as a liability within cash collateral on securities lent and repurchase agreements, reflecting the transaction's economic substance as a loan to the Bank. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of agreement using the EIR. When the counterparty has the right to sell or re-pledge the securities, the Bank reclassifies those securities in its statement of financial position to financial assets held for trading pledged as collateral or to financial investments available-for-sale pledged as collateral, as appropriate.

Conversely, securities purchased under agreements to resell at a specified future date are not recognized in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position, within cash collateral on securities borrowed and reverse repurchase agreements, reflecting the transaction's economic substance as a loan by the Bank. The difference between the purchase and resale prices is recorded in net interest income and is accrued over the life of the agreement using the EIR. If securities purchased under an agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within financial liabilities held for trading and measured at fair value with any gains or losses included in net trading income.

6.18 Securities lending and borrowing

Securities lending and borrowing transactions are usually collateralized by securities or cash. The transfer of the securities to counterparties is only reflected on the statement of financial position if the risks and rewards of ownership are also transferred. Cash advanced or received as collateral is recorded as an asset or liability.

Securities borrowed are not recognized in the statement of financial position, unless they are then sold to third parties, in which case, the obligation to return the securities is recorded as a short sale within financial liabilities held for trading and measured at fair value with any gains or losses included in net trading income.

6.19 Leases

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or whether the arrangement conveys a right to use the asset.

40

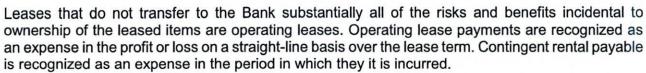

POBOX 25H

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.19 Leases (continued)

6.19.1 Bank as a lessee

6.19.2 Bank as a lessor

Leases where the Bank does not transfer substantially all of the risk and benefits of ownership of the asset are classified as operating leases. Rental income is recorded as earned based on the contractual terms of the lease in other operating income. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

The Bank assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

6.19.2 Bank as a lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Bank recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

The right-of-use assets are presented within Note 18 Property, equipment and right-of-use assets and are subject to impairment in line with the Bank's policy as described in Note 6.25 Impairment of non-financial assets.

Lease liabilities

At the commencement date of the lease, the Bank recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Bank and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.20 Property, equipment and right-of-use assets

Property and equipment excluding classes of buildings and motor vehicles are stated at cost excluding the costs of day—to—day servicing, less accumulated depreciation and accumulated impairment in value. Changes in the expected useful life are accounted for by changing the amortization period or methodology, as appropriate, and treated as changes in accounting estimates. Class of buildings and motor vehicles are measured at a revalued amount, being its fair value at the date of revaluation less subsequent depreciation and impairment, provided that fair value can be measured reliably. Right-of-use assets are presented together with property and equipment in the statement of financial position — refer to the accounting policy in Note 6.22. Right-of-use assets are depreciated on a straight-line basis over the lease term.

Depreciation of owned assets is calculated on a straight-line basis over the estimated useful lives of the assets, as follows:

Asset particulars	Useful life
Motor Vehicles and Motor Cycles	7 years
Furniture and equipment	5 years
Buildings	33 years
Computers and laptops	3 years
ATMs	7 years
Servers	7 years

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognized. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Leasehold improvement properties (improvement cost of rented Bank's buildings and offices) are depreciated over the periods of the leases period.

6.21 Intangible assets

Expenditure on research activities is recognized as an expense in the period in which it is incurred. Expenditure on development activities and Computer's software are capitalized if the product or process is technically and commercially feasible and the Bank has sufficient resources and the intention to complete development. The expenditure capitalized includes the costs of materials, direct labour, and an appropriate proportion of overheads and borrowing costs, where applicable. Capitalized costs are stated at cost less accumulated amortization and impairment losses. Other development expenditure is recognized as an expense in the period in which it is incurred. Other intangible assets that are acquired by the Bank are stated at cost less accumulated amortization (where the estimated useful life is finite) and impairment losses. Expenditure on internally generated goodwill and brands is recognized as an expense in the period in which it is incurred.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.21 Intangible assets (continued)

Amortization of intangible assets with finite useful lives is charged to profit or loss on a straight-line basis over the assets' estimated useful lives. Both the period and method of amortization are reviewed annually.

Intangible assets are not amortized while their useful lives are assessed to be indefinite. Any conclusion that the useful life of an intangible asset is indefinite is reviewed annually to determine whether events and circumstances continue to support the indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to finite is accounted for prospectively from the date of change and in accordance with the policy for amortization of intangible assets with finite lives.

6.22 Impairment of other non-financial assets

Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or, except in the case of goodwill, an impairment loss previously recognized no longer exists or may have decreased:

- Property, plant and equipment, including right-of-use assets (other than property carried at revalued amounts);
- intangible assets;
- Investments in subsidiaries, associates and joint ventures in the company's statement of financial position.

If any such indication exists, the asset's recoverable amount is estimated. In addition, for intangible assets that are not yet available for use and intangible assets that have indefinite useful lives, the recoverable amount is estimated annually whether or not there is any indication of impairment.

The recoverable amount of an asset is the greater of its fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

Recognition of impairment losses

An impairment loss is recognized in profit or loss if the carrying amount of an asset, or the cashgenerating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs of disposal (if measurable) or value in use (if determinable). PUDITOR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.22 Impairment of other non-financial assets (continued)

Reversals of impairment losses

In respect of assets other than goodwill, an impairment loss is reversed if there has been a favorable change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed. A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognized in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognized.

6.23 Employee's benefit and retirement obligation

6.23.1 Short term employee benefits

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

Employees of the Bank are members of Social Security Funds scheme (ZSSF and NSSF). Employees contribute 7% of their monthly salary to the Fund while the Bank contributes 13% of basic for each employee to the scheme and the amount is charged to profit or loss when due. For the obligation before the establishment of ZSSF in year 1998, PBZ on behalf of RGZ is liable to pay as gratuity obligation to its employees.

6.24 Provisions

Provisions are recognized when the Bank has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the effect of the time value of money is material, the Bank determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in the profit or loss net of any reimbursement in other operating expenses.

6.25 Taxes

6.25.1 Current tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from, or paid to, the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date in the Tanzania and generates taxable income.

Current income tax relating to items recognized directly in equity or other comprehensive income is recognized in equity or other comprehensive income respectively and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

6.25.2 Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences, except:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.25 Taxes (continued)

6.25.2 Deferred tax (continued)

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, where
 the timing of the reversal of the temporary differences can be controlled and it is probable that
 the temporary differences will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it becomes probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current and deferred taxes are recognized as income tax benefits or expenses in the profit or loss except for tax related to the fair value remeasurement of debt instruments at FVOCI, foreign exchange differences and the net movement on cash flow hedges, which are charged or credited to OCI.

These exceptions are subsequently reclassified from OCI to the profit or loss together with the respective deferred loss or gain. The Bank also recognizes the tax consequences of payments and issuing costs, related to financial instruments that are classified as equity, directly in equity.

The Bank only off-sets its deferred tax assets against liabilities when there is both a legal right to offset its current tax assets and liabilities and it is the Bank's intention to settle on a net basis.

6.25.3 Value added tax

Expenses and assets are recognized inclusive of the amount of value added tax except where the value added tax incurred on a purchase of assets or services is recoverable from the taxation authority, in which case the value added tax is recognized as an asset or liability in the statement of financial position.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.26 Dividends on ordinary shares

Dividends for the year that are approved after the reporting date are disclosed as an event after the reporting date.

6.27 Equity reserves

The reserves recorded in equity (OCI) on the Bank's statement of financial position include:

- Fair value reserves which comprises:
- The cumulative net change in the fair value of debt instruments classified at FVOCI, less the allowance for ECL
- The cumulative net change in fair value of equity instruments at FVOCI
- Foreign currency translation reserve, which is used to record exchange differences arising from the translation of the net investment in foreign operations
- Other capital reserves, which includes regulatory risk reserve and fixed assets revaluation reserve

6.28 Government grants

Government grants are recognized in the statement of financial position initially when there is reasonable assurance that they will be received and that the Bank will comply with the conditions attaching to them. Grants that compensate the Bank for expenses incurred are recognized as income in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Bank for the cost of an asset are deducted from the carrying amount of the asset and consequently are effectively recognized in profit or loss over the useful life of the asset by way of reduced depreciation expense.

When the Bank receives grants of non-monetary assets, the asset and the grant are recorded at nominal amounts and released to profit or loss over the expected useful life of the asset, based on the pattern of consumption of the benefits of the underlying asset by equal annual instalments.

6.29 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of that asset. Other borrowing costs are expensed in the period in which they are incurred. The capitalization of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress.

Capitalization of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or complete.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

6. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6.30 Non-current assets held for sale

A non-current asset (or disposal group) is classified as held for sale if it is highly probable that its carrying amount will be recovered through a sale transaction rather than through continuing use and the asset (or disposal group) is available for sale in its present condition. A disposal group is a group of assets to be disposed off together as a group in a single transaction, and liabilities directly associated with those assets that will be transferred in the transaction.

Immediately before classification as held for sale, the measurement of the non-current assets (and all individual assets and liabilities in a disposal group) is brought up-to-date in accordance with the accounting policies before the classification. Then, on initial classification as held for sale and until disposal, the non-current assets (except for certain assets as explained below), or disposal groups, are recognized at the lower of their carrying amount and fair value less costs to sell. These assets, even if held for sale, would continue to be measured in accordance with the policies set out elsewhere. Impairment losses on initial classification as held for sale, and on subsequent remeasurement while held for sale, are recognized in profit or loss. As long as a non-current asset is classified as held for sale, or is included in a disposal group that is classified as held for sale, the noncurrent asset is not depreciated or amortized.

7. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Bank's financial statements requires management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. In the process of applying the Bank's accounting policies, management has made the following judgments and assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Existing circumstances and assumptions about future developments may change due to circumstances beyond the Bank's control and are reflected in the assumptions if and when they occur. Items with the most significant effect on the amounts recognized in the financial statements with substantial management judgment and/or estimates are collated below with respect to judgments/estimates involved.

7.1 Impairment losses on financial assets

The measurement of impairment losses both under IFRS 9 across all categories of financial assets in scope requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

7. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

7.1 Impairment losses on financial assets (continued)

- The Bank's definition of default and The Bank's staging criteria
- The Bank's criteria for assessing if there has been a significant increase in credit risk
- Segmentation for Conventional loans
- The Bank's internal credit grading model, which assigns PDs to the individual grades
- Probability of Default (PD) methodology for conventional loans
- · Loss Given Default (LGD) methodology
- Exposure at Default (EAD) methodology
- Unutilized facilities of overdrafts were calculated as the difference between the limits and the sum of outstanding exposure. And thereafter applied a CCF to arrive to their exposure at default.
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models. It has been the Bank's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

7.2 Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt on the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

7.3 Fair value of financial instruments

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values.

7.4 Effective Interest Rate (EIR) method

The Bank's EIR method, as explained in Note 6.2.1, recognizes interest income using a rate of return that represents the best estimate of a constant rate of return over the expected behavioral life of loans and deposits and recognizes the effect of potentially different interest rates charged at various stages and other characteristics of the product life cycle (including prepayments and penalty interest and charges). This estimation, by nature, requires an element of judgment regarding the expected behavior and life-cycle of the instruments, as well expected changes to country base rate and other fee income/expense that are integral parts of the instrument.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

7. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

7.5 Estimating the incremental borrowing rate

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate ('IBR') to measure lease liabilities. The IBR is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank 'would have to pay', which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when they need to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency).

Management has considered adjusted Bank of Tanzania (BOT) bonds rates to be the incremental borrowing rate. Incremental borrowing rate have been arrived after conducting a thorough analysis of the lending rates if the entities were PBZ can borrow to finance construction or acquisition of the leases asset. Our analysis indicated that PBZ can borrow at 12.5% at ZSSF, 12% at TMRC (previous rate for member institutions) and 9.5% at TMRC (current rate for member institutions). Based on best finance of the management, incremental borrowing rate was taken to be 9.5% which represent the rate that Bank can borrow from TMRC. This has been considered to be unbiased and cheaper source of fund to finance acquisition or construction of the leased assets.

7.6 Taxes

The Bank subject to compliance with two different tax legislation which is Tanzania revenue Authority and Zanzibar revenue Authority, TRA deal with compliance of Income tax act which contains corporate tax, employment tax (PAYE) and other withholding tax, includes excise duty for Mainland Tanzania services, while ZRA deal VAT, Stamp duty and excise duty and levy on Electronic Money Transfer for Zanzibar consumption services. PBZ as ZRA agent during year 2022 manage to collect TZS 1,468 million (2021, TZS 619 million) from various Bank suppliers and paid to ZRA. Also for TRA withholding tax paid for 2022 was TZS 1,232 million (2021, TZS 730 million).

During the year 2022, Bank paid TZS 13,885 million as Corporate tax compared with TZS 9,202 million paid for the year 2021.

The Bank prepares its accounts in accordance with IFRS, however the recognized profit by IFRS requires some adjustments as directed by income tax act, 2014, to arrive at taxable base for 30% corporate tax charge, this will result into differed deferred tax, according to IAS 12, is the amount of tax payable /receivable in future in respect of taxable temporary difference. Temporary differences are defined as being differences between the carrying amount of an asset (or liability) within the Statement of Financial Position and its tax base that is the amount at which the asset (or liability) is valued for tax purposes by the relevant tax authority.

The deferred tax asset recognized as at 31st December, 2022 by Bank is TZS 9,861 million compared to the year 2021 which is TZS 8,526 million.

7. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

7.7 Provisions

The Bank use IFRS 9 tools for calculating impairment charges for their financial assets, during year 2022 loan and advance estimated to TZS 9,736 million (2021, TZS 8,232 million) Islamic financing TZS 1,354 million (2021, TZS 1,514 million), Government Securities TZS 491 million (2021 TZS 60 million), Other assets estimated TZS 15,146 million (2021, TZS 14,153 million) and TZS 2,000 million was changed for impairment on Equity investment during the year.

Regulatory provision as specified by BOT for loan and advance was estimated TZS 12,591 million (2021, TZS 15,495 million), Islamic financing was TZS 1,983 million (2021 TZS 2,954 million).

7.8 Property and equipment and intangible assets

Critical estimates are made by the Directors in determining the useful lives of property and equipment and intangible assets as well as their residual values.

9. FAIR VALUE MEASUREMENT

This note describes the fair value measurement of both financial and non-financial instruments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price), regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as explained blow.

9.1 Assets and liabilities by fair value hierarchy

The following table presents the fair value of the Bank's properties measured at the end of the reporting period categorized into the three-level fair value hierarchy as defined in IFRS 13, *Fair value measurement*. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e., unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date
- Level 2 valuations: Fair value measured using Level 2 inputs i.e., observable inputs
 which fail to meet Level 1, and not using significant unobservable inputs.
 Unobservable inputs are inputs for which market data are not available
- Level 3 valuations: Fair value measured using significant unobservable inputs

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

9. FAIR VALUE MEASUREMENT (CONTINUED)

9.1 Assets and liabilities by fair value hierarchy (continued)

Amount under property and equipment represent categories of buildings and motor vehicles for which measured at revaluation model. Other categories in the PPE are carried at cost model.

9.2 Valuation techniques and methods

Equity Investments at FVOCI

The AFREXIM Bank equity investment is actively traded on Stock Exchange of Mauritius with readily available active prices per Depository Receipt. Further, the Bank published recently Net Asset Value (NAV) which is the Bank used as fair value. Thus, the Bank classified the asset as Level 1.

The NAV serves as the basis for subscription and redemption transactions for investors in the entity. If the investment is required to be measured at fair value, and does not have a readily determinable fair value, it may qualify for a practical expedient (that is not available under IFRS) to determine the fair value of investments using NAV, without adjustment, in certain defined circumstances. This practical expedient can be applied on an investment-by-investment basis, but should be applied consistently to the entire investment in that entity. Further, it is an accounting policy election and should be applied consistently from period to period, unless a change is preferable.

Other investments (TMRC, UMOJA SWITCH and SWIFT) categorized as level 2 since by the price quoted are exist in active market with no significant unobservable inputs.

Other assets under scope of IFRS 9 and non-financial assets

All other assets as shown above, the Bank classified in level 3 since there are no quoted price in active market with significance unobservable input.

10. FINANCIAL RISK MANAGEMENT

10.1 Introduction and risk profile

Whilst risk is inherent in the Bank's activities, it is managed through an integrated risk management framework, including ongoing identification, measurement and monitoring, and subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank mainly is exposed to credit risk, market risk, currency risk, liquidity risk, operational risk and interest risk. The Bank's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Bank's financial performance.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.2 Risk management structure

The Board of Directors is responsible for the overall risk management approach and for approving the risk management strategies and principles. The Board Audit and Risk Management Committee has the overall responsibility for the development of the risk strategy and implementing principles, frameworks, policies and limits. The Board Audit and Risk Management Committee is responsible for managing risk decisions and monitoring risk levels and reports to the Board of Directors.

The Risk and Compliance Unit is responsible for implementing and maintaining risk related procedures to ensure an independent control process is maintained. The unit works closely with and reports to The Board Audit and Risk Management Committee to ensure that procedures are compliant with the overall framework.

The Risk and Compliance Unit is responsible for monitoring compliance with risk principles, policies and limits across the Bank. Each business unit has responsible for the control of risks, including monitoring the actual risk of exposures against authorised limits and the assessment of risks of new products and structured transactions. It is the Bank's policy that this unit also ensures the complete capture of the risks in its risk measurement and reporting systems. The Bank's policy also requires that exceptions are reported on a daily basis, where necessary, to the Board Audit and Risk Management Committee, and the relevant actions are taken to address exceptions and any areas of weakness.

The Bank's Treasury is responsible for managing its assets and liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Bank. The Bank's policy is that risk management processes throughout the Bank are audited annually by the Internal Audit function, which examines both the adequacy of the procedures and the Bank's compliance with them. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Board Audit and Risk Management Committee.

10.3 Risk measurement and reporting systems

The Bank's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst-case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that the Bank is willing to accept, with additional emphasis on selected industries. In addition, the Bank's policy is to measure and monitor the overall risk-bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Credit risk

Credit risk is the risk that the Bank will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Bank manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits. Credit risk is monitored by the credit department. It is their responsibility to review and manage credit risk, including environmental and social risk for all types of counterparties.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or group of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review. The Board of Directors approves limits on the level of credit risk.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral and corporate and personal guarantees, but a significant portion is personal lending where no such facilities can be obtained.

10.4.1 Credit risk measurement

In measuring credit risk of loans and advances to customers and to Banks at a counterparty level, the Bank reflect two components (i) the 'probability of default' by the client or counterparty on its contractual obligations and (ii) current exposures to the counterparty and its likely future development, from which the Bank derives the 'exposure at default'. These credit risk measurements, which reflect expected loss (the 'expected credit loss model'), are embedded in the daily operational management and are in line with IFRS 9.

The Bank uses reasonable and supportable forward-looking information that is available without undue cost or effort in its assessment of significant increase of credit risk as well as in its measurement of ECL. External and internal information is used to generate a 'base case' scenario of future forecast of relevant economic variables along with a representative range of other possible forecast scenarios. The external information used includes economic data and forecasts published by governmental bodies and monetary authorities.

Bank's internal rating scale

The Bank has its internal credit rating tools tailored in accordance with the Bank of Tanzania guidelines. Customers of the Bank are segmented into five rating classes. The Bank's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class.

Bank's rating	Description of the grade	Number of days outstanding
1.	Current	0-30
2.	Especially mentioned	31-90
3.	Sub-standard	91-180
4.	Doubtful	181-360
5.	Loss	361 - Above

10.4 Credit risk (continued)

Bank's internal rating scale (continued)

Bank's rating	Description of the grade	Number of days outstanding
1	Current	0-30
2	Especially mentioned	31-90
3	Sub-standard	91-180
4	Doubtful	181-360
5	Loss	361 - Above

10.4.1.1 Significant increase in credit risk

The Bank monitors all financial assets that are subject to assess whether there has been a significant increase in credit risk since initial recognition. When there is a significant increase in credit risk (SICR) since initial recognition is identified, a financial asset is moved from stage 1 to 'Stage 2' but is not yet deemed to be credit-impaired. If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.

The table below summarises the 'three-stage' model for impairment based on changes in credit quality since initial recognition

	Stage 1 (performing loans)	Stage 2 (under performing loans)	Stage 3 (non- performing loans)
Credit risk	Financial instruments with low credit risk at the reporting date or which have not had SICR	Financial instruments which have had a significant increase in credit risk since initial recognition but do not have objective evidence of a credit loss event.	Financial assets that have objective evidence of impairment at the reporting date
Recognition of expected credit losses	12 Month expected credit losses are recognized.	Lifetime expected credit losses are recognised.	Lifetime expected credit losses are recognized.
Recognition of interest	Interest revenue is calculated on the gross carrying amount of the asset.	Interest revenue is calculated on the gross carrying amount of the asset.	Interest revenue is calculated based on the amortized cost net of the loss provision, (net carrying amount).

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Credit risk (continued)

10.4.1 Credit risk measurement (continued)

10.4.1.1 Significant increase in credit risk (continued)

The Bank considers a debt instrument asset, loan commitments and financial guarantee contracts to have experienced a significant increase in credit risk when one or more of the following quantitative or qualitative criteria have been met:

Loans and advances/financing to customers

i) Quantitative criteria

Based on quantitative review for the purpose of the expected credit losses calculations, loans and advances, loan commitments and financial guarantees shall be classified as follows;

- 0 30 days to be classified as Stage 1; Loans and advances, loan commitments and financial guarantees which are performing according to contracted terms and conditions with low credit risk at the reporting date with 12-month expected credit losses being recognised.
- 31 90 days to be classified as Stage 2; Loans and advances, loan commitments and financial guarantees which have had significant increase in credit risk since initial recognition but do not have objective evidence of credit loss event with lifetime expected credit losses being recognized.
- 91 days or more to be classified as Stage 3; Loans and advances, loan commitments and financial guarantees which have objective evidence of impairment at the reporting date with lifetime expected credit losses being recognized (credit-impaired assets).

ii) Qualitative criteria

For Personal Loans/financing, if the borrower meets one or more of the following criteria:

- Short-term forbearance or restructuring.
- Adverse changes of external data from credit references agencies.

For Commercial loans/financing, if the borrower is on the Watch list and/or the instrument meets one or more of the following criteria:

- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates.
- · Actual or expected forbearance or restructuring.
- Actual or expected significant adverse change in operating results of the borrower.
- Significant change in collateral value which is expected to increase risk of default.
- Early signs of cash flow/liquidity problems such as delay in servicing of loans/financing.
- Adverse changes of external data from credit references agencies

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Credit risk (continued)

10.4.1 Credit risk measurement (continued)

10.4.1.1 Significant increase in credit risk (continued)

Balances due from other Banks

Below are qualitative factors considered as indicators of significant increase in credit risk;

- Significant counterparty management restructuring due to continues bad performance of the company.
- Significant adverse change in the regulatory, economic or technology of the borrower that results in a significant change in the borrower's ability to meet its debt obligations.
- Significant reductions in financial support from a parent company that resulted to significant adverse change of operating results of the counterparty.

Government securities

Below are qualitative factors considered as indicators of significant increase in credit risk;

The Government has initiated debt restructuring process.

Grouping of instruments for losses measured on a collective basis

For expected credit loss provisions modelled on a collective basis, a Grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a Bank are homogeneous. The characteristics used to determine Grouping are product type, Industry, collateral type etc.

10.4.1.2 Definition of default and credit-impaired assets

The Bank defines a financial instrument as in default, which is fully aligned with the definition of credit- impaired, when it meets one or more of the following criteria:

Loans and advances/financing to customers

Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Credit risk (continued)

10.4.1 Credit risk measurement (continued)

10.4.1.2 Definition of default and credit-impaired assets

Loans and advances/financing to customers (continued)

Qualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- · the borrower is in long-term forbearance;
- · the borrower is deceased;
- · the borrower is insolvent;
- the borrower is in breach of financial covenant(s);
- an active market for that financial asset has disappeared because of financial difficulties;
- · concessions have been made by the lender relating to the borrower's financial difficulty;
- · it is becoming probable that the borrower will enter Bankruptcy; and,
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses.

Balances due from other Banks

For balances from other Banks, below are considered as default when they occur

- When repayment of interest and principal are not done on time as per contractual schedules to the extent of 30 days delay;
- When a counterparty is taken under management by Statutory Manager;
- When a counterparty licence has been revoked by the Central Bank; and,
- When the counterparty is declared Bankrupt by responsible bodies like Registration, Insolvency or court.

Government securities

For Government securities, below are considered as default when they occur;

 When repayments of interest and principal are not done on time as per contractual schedules and that such delays considered are not those caused by operational issues

The default definition has been applied consistently to model the probability of default (PD), exposure at default (EAD) and loss given default (LGD) throughout the Bank's expected loss calculations.

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Credit risk (continued)

10.4.1 Credit risk measurement (continued)

10.4.1.3 Forward looking information incorporated in the ECL model

The forward-looking information that has been incorporated in the ECL Model including:

 Macro factor, such as foreign exchange rate, Consumer price index and Real and Nominal GDP has been used to ascertain associated with stress factor on economic sector, presence of covid-19

10.4.1.4 Economic variable assumptions

The economic variables used during ECL Model calculation include

- Foreign Exchange Rate
- Consumer price Index
- · Nominal and Real GDP.

10.4.2 Risk limit control and mitigation policies

This policy focus on management of risk associate with price movement in market, that interest rate and foreign exchange rate. The People's Bank of Zanzibar's operations among others, include taking of foreign exchange deposits and borrowings as well as issuance of foreign currencies loans. Likewise, the Bank takes interest bearing local currency deposits and borrowings for investment in interest earning assets like loans/advances, inter-Bank lending and government securities. These activities expose the Bank to foreign exchange rate and interest rate fluctuations. This market risk policy provides guidance for managing foreign exchange risk and interest rate risks in the Bank.

Some other specific control and mitigation measures are out lined below;

(a) Collateral

- Landed Mortgage Collateral
- · Debenture and Chattel Mortgage
- Corporate Guarantee
- Government Guarantee
- Cash Cover
- Unsecured

(b) Credit-related commitments

These are the off-balance sheet item which comprises guarantees of different nature, letter of credit and undrawn balances. These credit related issues are extended to customers who are either entered to Government tender or import goods from abroad. For undrawn balances comprises the unutilised overdraft facilities.

10.4.5.2 Changes in gross carrying amount

Significant changes in the gross carrying amount of financial assets that contributed to changes in the loss allowance were as follows:

Changes in gross carrying amount was associated with the increasing trend in issuing of new personal loan to TPDF and some corporate customers in both PBZ Convention and PBZ Islamic. List the factors which led to change in gross carrying amount of loans such as high volume of new Salaried Workers Loans and other consumer's loans originated during the period.

The following table further explains changes in the gross carrying amount and explains their significance to the changes in the loss allowance for the same portfolio as discussed above;

10.4.6 Write-off

The Bank may write-off financial assets that are still subject to enforcement activity while the Bank still seeks to recover amounts it is legally owed in full. According to BOT regulations the Bank required to charge off credit accommodation and other assets that has been remained in loss category for four (4) consecutive quarters. Total of TZS 5,588 million was written off during the year ended 31st December 2022.

10.4.7 Loan restructuring

There was no loan restructuring during the reporting period due to the decreasing on bank's liquidity caused by the impact of COVID-19.

10.4.8 Investment securities

The investment securities held by Bank comprise of private corporate bonds, and treasury bills and bonds issued by the Government Tanzania, refer Note 13. All these investments were considered to be under Stage 1. These investment securities are held with the Government or institutions with good financial standing and no history of default. They are not rated

10.4.9 Repossessed collateral

During the year, the Bank did not obtain assets by taking possession of collateral held as security. Repossessed properties are usually sold as soon as practicable, with the proceeds used to reduce the outstanding indebtedness.

NOTES TO FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10. FINANCIAL RISK MANAGEMENT (CONTINUED)

10.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices. The Bank classifies exposures to market risk into either trading (the Trading book) or non-trading (the Banking book) portfolios and manages each of those portfolios separately.

Market risk – trading (trading book) includes financial assets and financial liabilities designated at fair value through profit or loss. Market risk (Banking book) is the Bank's primary business model to collect deposits, and use these funds to provide loans and other funding products and debt instruments to its customers. Interest rate risk is the impact that changes in interest rates could have on the Bank's margins, profit or loss, and equity. Interest risk arises from the mismatch of interest payable on the Bank's liabilities and the interest earned on its assets.

The market risk for the trading portfolio is managed and monitored using value at risk (VaR) that reflects the interdependency between risk variables. The Bank's risk management strategy for its Banking book is different for each of the following categories of market risk as Interest rate risk and Currency risk.

All trading instruments are subject to market risk, i.e. the risk that future changes in market conditions may make an instrument less valuable. The instruments are evaluated on daily basis at fair value and all changes in market conditions directly affect trading income. The Bank manages its portfolios in response to changing market conditions. Exposure to market risk is managed in accordance with limits formally set for managing foreign currency assets.

10.5.1 Interest rate risk

The Bank is exposed to various risks associated with the effect of fluctuations in the prevailing levels of market interest rates on its financial position cash flows. The table below summarizes the exposure to interest rate risks. Included in the table are the Bank's assets and liabilities at carrying amounts, categorized by the earlier of contractual reprising or maturity dates. The Bank does not bear an interest rate on off balance sheet items. All figures are in millions of Tanzania Shilling.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10.6 Liquidity risk

Liquidity risk is defined as the risk that the Bank does not have sufficient liquid financial resources to meet obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Bank might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances.

Such scenarios could occur when funding needed for illiquid asset positions is not available to the Bank on acceptable terms. To limit this risk, management has arranged for diversified funding sources in addition to its core deposit base, and adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and liquidity on a daily basis.

10.6.1 Liquidity risk management process

Liquidity risk is the risk that the Bank will encounter difficulty in meeting obligations from financial liabilities. The Assets and Liabilities Committee (ALCO), a management committee is tasked with the responsibility of ensuring that all foreseeable funding commitments and deposits withdrawals can be met when due, and that the Bank will not encounter difficulty in meeting obligations from its financial liabilities as they occur. ALCO relies substantially on the Bank's Treasury section to coordinate and ensure discipline across the Bank, certify sufficient liquidity under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation.

10.6.2 Funding approach

The Bank's major source of funding is customer deposits. To this end, the Bank maintain a diversified and stable funding base comprising current/demand, savings and time deposits. The Bank places considerable importance on the stability of these deposits, which is achieved through the operations Banking activities and by maintaining depositor confidence in the Bank's business strategies and financial strength.

The Bank borrows from the inter-Bank market through transactions with other Banks for short term liquidity requirements. As part of the contingency funding plan, the Bank has also long-term funding as bond from pension funds for long term liquidity assurance.

10.6.3 Non-derivative cash flows

The table below presents the cash flows payable by the Bank under non-derivative financial liabilities by remaining contractual maturities at the end of reporting period. The amounts disclosed in the table below are the undiscounted cash flows. As at 31 December 2021, the interest-bearing deposits had a balance of TZS 201 billion (2020: 174 billion).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

10.6.4 Assets held for managing liquidity risk

The Bank's assets held for managing liquidity risk comprise:

- · Cash and balances with the Bank of Tanzania (excluding SMR);
- · Investment in government securities; and
- · Placements with other Banks:

In the normal course of business, a proportion of customer loans contractually repayable within one year will be extended. The Bank would also be able to meet unexpected net cash outflows by selling securities and accessing additional funding sources such as asset-backed markets.

10.FINANCIAL RISK MANAGEMENT (CONTINUED)

10.8 Fair value of financial assets and liabilities

10.8.1 Fair value estimation

IFRS 13 requires the Bank to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The Bank specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Bank's market assumptions. These two types of inputs have created the following fair value hierarchy:

 Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

 Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

OF

MAISARA STRI

ZANZIBAR

- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).
- This hierarchy requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible.

There were no transfers between the levels during the year.

Fair value of financial assets and liabilities that are not measured at fair value

Cash and balances with Bank of Tanzania

The carrying amount of cash and balances with Bank of Tanzania is a reasonable approximation of fair value.

Investment in government securities

Investment in government securities includes treasury bonds and treasury bills. The fair value of government securities has been determined by discounting the estimated future cash flows expected cash flows at current market yields as observed from rates of similar bills and bonds traded by Bank of Tanzania.

Loans and advances to banks

Loans and advances to Banks include inter-Bank placements and items in the course of collection. The carrying amount of floating rate placements and overnight advances is a reasonable approximation of fair value. The estimated fair value of fixed interest-bearing advances is based on discounted cash flows using prevailing money-market interest rates for debts with similar credit risk and remaining maturity.

10.8 Fair value of financial assets and liabilities (continued)

10.8.1 Fair value estimation (continued)

Loans and advances to customers

Loans and advances are net of charges for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

Deposits from Banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest-bearing deposits, is the amount repayable on demand.

The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity

Borrowings

Significant portion of borrowing is benchmarked to LIBOR and therefore reprices at balance sheet date. Management has considered the impact of borrowings with fixed interest rate as insignificant

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

to the total fair value of borrowings. The fair value of borrowings therefore approximates its carrying value.

TOTAL	229,636,909	193,337,620

Deposit with the BOT represents mandatory Statutory Minimum Reserve (SMR) reserve deposits which is not available for use in the Bank's day-to-day operations.

In accordance with Sections 4 and 71 of the Banking and Financial Institutions Act, 2006; the Bank is required to maintain SMR on its total deposit liabilities and funds borrowed from the general public. The SMR deposit should be at least 10% of customers' total deposits and borrowings from the general public and 40% of government's deposits. The SMR deposit is therefore excluded from cash and cash equivalents for the purpose of the statement of cash flows (Note 42). Balances with Central Banks are non-interest-bearing assets.

12%, 7 years Corporate Bond to ZSSF	10,000,000	10,000,000
Accrued interest on bond	418,171	678,513
	20,418,171	15,678,513

23. BORROWING

	2022	2021
Inter-bank borrowing Accrued interest on borrowing	TZS'000	TZS'000
	153,108,903 511,010	83,832,711 27,841
	153,619,913	83,860,552

24. DEBT RECONCILIATION

The analysis and movement of the Bank net debt is as follows.

	2022 TZS'000	2021 TZS'000
Cash and cash equivalents	457,965,974	268,963,704
Borrowings repayable within one year	(153,619,913)	(88,832,711)
Borrowings repayable after one year	(20,418,171)	(10,678,513)
Lease liabilities due after 1 year	(6,386,435)	(5,402,133)
Lease liabilities due within 1 year	(1,660,681)	(1,923,088)
Net debt	275,880,774	162,127,259
Cash and cash equivalents	457,965,974	268,963,704
Gross debt – fixed interest rate	(182,085,200)	(106,836,445)
Net debt	275,880,774	162,127,259

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

25. DEFERRED TAX ASSET

	2022 TZS'000	2021 TZS'000
As at beginning	(8,525,943)	(3,912,730)
(Charge)/release for the year	(1,334,907)	(4,613,213)
Deferred tax asset as at year end	(9,860,850)	(8,525,943)

Deferred income tax is calculated on all temporary differences under the liability method using a principal tax rate of 30%. The movement on the deferred income tax account is as follows:

	2022 TZS'000	2021 TZS'000
At start of year Credit to profit or loss:	(8,525,943)	(3,912,729)
In respect to current year	(1,334,907)	(4,613,213)
At the end of year	(9,860,850)	(8,525,943)

26. SHARE CAPITAL

	2022 TZS'000	2021 TZS'000
Authorised share capital 600,000,000 Ordinary Share of TZS 100 each	60,000,000	60,000,000
Issued and fully paid-up share capital 310,000,000 Ordinary Shares TZS 100 each	31,000,000	31,000,000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

27. GOVERNMENT GRANT

	2022 TZS'000	2021 TZS'000
ChakeChake building	340,160	340,160
Forodhani Building	139,160	139,160
Motor Trade building (Malindi)	2,160,000	2,160,000
Wete Hotel Building (Wete Pemba)	158,400	158,400
Makunduchi Building	206,689	206,689
Kiembe samaki (Mazizini) Land	396,000	396,000
Makunduchi Land	21,225	21,225
Sub total	3,421,634	3,421,634
Amortization as at 1January 2022	(111,009)	(88,807)
Amortization during the year	(17,462)	(22,202)
Sub total	(128,471)	(111,009)
Carrying amount	3,293,163	3,310,625

Government grant represents asset assisted by the Revolutionary Government of Zanzibar.

28. REGULATORY RISK RESERVE

Provision for non-performing assets is computed using both IFRS 9 (ECL) approach and BOT regulatory approach. ECL provision is charged to the profit or loss. Where the ECL provision is less than BOT provision, then the excess over ECL provision is taken to a non-distributable reserve known as Regulatory Risk Reserve. During the period under review the provisions using both approaches were as follows:

	2022	2021
	TZS'000	TZS'000
Opening balance of reserve	8,703,829	2,726,061
Increase/(Decrease) of reserve during the year	(5,219,610)	5,977,768
	3,484,219	8,703,829
Analyzed as:		
Provision per BOT regulations	14,574,295	18,449,508
ECL Provision	(11,090,076)	(9,745,679)
Excess over ECL provision impact to Regulatory risk reserve	3,484,219	8,703,829

The Regulatory Risk Reserve is not part of the Bank's core capital.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

29. OTHER RESERVES

	2022 TZS'000	2021 TZS'000
Other reserves comprise of the following:		
Fixed assets revaluation reserve	1,054,868	1,232,295
Fair value reserve	824,164	810,273
Retained earnings	107,236,087	76,808,661
•	109,115,119	78,851,229

Fixed Assets Revaluation Reserve

The Bank maintains a Fixed Assets Revaluation Reserve to account for revaluation surpluses. If an asset carrying amount increases as a result of revaluation, the increase is credited directly to Fixed Asset Revaluation Reserve. However, the increase is recognized in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit or loss. If an asset's carrying amount decreases as a result of revaluation, the decrease is recognized in profit or loss. However, the decrease is debited directly to Fixed Assets Revaluation Account to the extent of any credit balance existing in the revaluation surplus in respect of that asset. The Fixed Assets Revaluation Reserve is not part of the Bank's core capital. The Bank opted revaluation model in measurement of building and motor vehicle categories in the PPE.

Fixed assets Revaluation Reserve movement during the year is shown below:

		2022 TZS'000	2021 TZS'000
Particulars	- 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1

44. RELATED PARTY TRANSACTIONS

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. The bank is controlled by the revolutionary government of Zanzibar, which owns 100% of ordinary shares. All transactions with the Government Ministries and Government owned institutions are considered transactions with related parties. A number of banking transactions were entered with related parties in the normal course of business. These included loans, deposits and foreign currency transactions. The volume of related party transactions, outstanding amounts and related expense and income for the period ended 31st December 2022 were as follows: -

45. CONTINGENT LIABILITIES AND COMMITMENTS

Guarantees, Letter of Credits and Undrawn Overdraft facilities:

Uncalled Capital in Afrexim Bank

As at 31st December, 2022, the Bank had a commitment of USD 1,111 million in respect of uncalled and unpaid 33 share attached to its shareholding in the Afrexim Bank. The value of paid-up shares is shown under Note 16 above.

46. CHEQUES AND ITEMS FOR CLEARING

As at 31st December 2022 the Cheque and items for clearing is TZS 580 million.

47. CAPITAL ADEQUACY

The Bank monitors the adequacy of its capital using ratios established by the Bank of Tanzania. These ratios measure capital adequacy by comparing the Bank's eligible capital with its balance sheet assets, off-balance sheet commitments and market and other risk positions at a weighted amount to reflect their relative risk. The Bank maintains an actively managed capital base to cover risks inherent in the business and is meeting the capital adequacy requirements as per BOT supervision. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision (BIS rules/ratios) and adopted by the BOT. The Bank has complied in full with all its externally imposed capital requirements over the reported period.

47.1 Capital management

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of statement of financial positions, are:

- •To comply with the capital requirements set by the Bank of Tanzania (BoT);
- •To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- •To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Bank's management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the Bank of Tanzania (BoT), for supervisory purposes. The required information is filed with the BoT on a quarterly basis.

The Bank of Tanzania requires each Bank to:

- (a) Hold a minimum level of core capital of TZS 15 billion.
- (b) Maintain a ratio of core capital to the risk-weighted assets plus risk-weighted off-balance sheet assets or above the required minimum of 10%; and
- (c) Maintain total capital of not less than 12% of risk-weighted assets plus risk-weighted off-balance sheet items.

ROLLER AND

PANZIBAR

PO

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

47.1 Capital management (continued)

Maintain a capital conservation buffer of 2.5% of risk-weighted assets and off-balance sheet exposures from August 2018. The capital conservation buffer is made up of items that qualify as tier 1 capital.

When the Bank is holding capital conservation buffer of less than 2.5% of risk-weighted assets and off-balance sheet exposures but is meeting its minimum capital requirements that Bank:

- Shall not be distribute dividends to shareholders or bonuses to senior management and other staff members until the buffer is restored to at least 2.5%.
- Shall submit a capital restoration plan to Bank of Tanzania within a period specified by BoT, indicating how the Bank is going to raise capital to meet its minimum requirement including capital conservation buffer within a specified period of time; and
- In the event that BoT does not approve the capital restoration plan, it may direct the Bank to raise additional capital within a specified time period in order to restore its capital conservation buffer.

The Bank's regulatory capital as managed by its Finance Department is divided into two tiers:

- Tier 1 capital: means permanent shareholders' equity in the form of issued and fully paid ordinary shares, and perpetual non-cumulative preference shares, capital grants and disclosed reserves less year to date losses, goodwill organization, pre-operating expenses, prepaid expenses, deferred charges, leasehold rights and any other intangible assets.
- Tier 2 capital: means general provisions, which are held against future, presently
 unidentified losses and are freely available to meet losses, which subsequently
 materialize, subordinated debts, cumulative redeemable preferred stocks and any other
 form of capital as may be determined and announced from time to time by the Bank.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2022

47. CAPITAL ADEQUACY (CONTINUED)

The table below summarizes the composition of regulatory capital and the ratios of the Bank for the year ended 31 December 2022 and year ended 31 December 2021.
